

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

ANNUAL REPORT.

Pursuant to the Act of 3d of March, 1818, the Controllers of the Public Schools of the First School District of Pennsylvania, present to the Citizens of Philadelphia the following Report :

By reference to the tables in the last Annual Report, it will appear that the number of children in the Public Schools of the City of Philadelphia on the 31st of December, 1866, was 77,164 And it will appear by the tables herewith submitted,

that the number on the 31st of December, 1867,	
was	80,410
Showing an increased attendance during the present	year of
	3,246

Of the number at the end of 1867, 40,733 are boys, and 39,677 are girls.

It was thought advisable during the past year, to ascertain, with some degree of precision, how many children in our City did not avail themselves of public or private education; and further, how many of these were between the ages of six and twelve, twelve and fifteen, fifteen and eighteen; and likewise, what proportion of the children of Philadelphia were in Parochial Schools, engaged in regular employment, or not so engaged. In order to obtain this information, it was deemed advisable to invoke the assistance of our esteemed Mayor, the Honorable Morton McMichael, and through him to obtain the services of the Police Department. With his accustomed readiness to subserve the interests of education, he cheer-

fully acquiesced in the wishes of the Controllers, and, after the necessary blanks were prepared and furnished, he caused a census to be taken by carefully selected officers of the Police Department, who faithfully and diligently performed these extra services. The table herewith submitted gives the result. It is to be remarked, that, from causes entirely beyond the control of the officers, the aggregate number of children enumerated, is below the actual number within our City. In some cases, the children were at school, their parents at work, and their dwellings locked; in some cases, information was refused; and in other cases, families were temporarily absent from the City.

We may be well satisfied that the number registered by the officers is, at least, not an exaggeration. It would not be unfair to add to this number at least five per cent. for omissions; so that in point of fact, the number of children in the City of Philadelphia, between six and eighteen years of age, is not less than one hundred and fifty thousand; and, by a reasonable computation upon this basis, the population of the City of Philadelphia may be estimated at not less than eight hundred thousand.

From the census returns thus taken, we are startled by the fact that of the whole number of children in the City of Philadelphia, there are twenty thousand five hundred and thirty-four between the ages of six and eighteen, who are neither at public, private, nor Parochial Schools, and who are not at employment. It may be said that out of this proportion, some have finished their school education, and are engaged in domestic occupations at home; but this proportion is very small, for we find that the whole number between the ages of fifteen and eighteen is only five thousand one hundred and thirty, while the number of those between six and fifteen, is upwards of fifteen thousand. It is difficult to realize the fact, that, in a City so largely blessed with public, private, and parochial advantages of education, fifteen thousand of her children, between the ages of six and fifteen, do not avail themselves of the facilities

of improvement within their reach and free of cost; and still more difficult is it to be believed, that the parents of nearly eleven thousand children between the ages of six and twelve, can be so unmindful of the mental and moral training of their children, as to leave them entirely unemployed. What the results of such culpable indifference may be, it is not difficult to foretell; but they may be illustrated, in too many instances, within the walls of our alms-houses, in the prisons, and in the purlieu of our City. It is indeed time to consider whether compulsory education may not become an absolute necessity.

These remarks, painful as they may be, are thrown out that they may claim public attention, and thus perhaps be the first step to reform. Society has the right to protect itself against the growth of vice, by the adoption of wholesome laws which will cure evils, as well as those which punish crimes.

APPOINTMENT OF SCHOOL CONTROLLERS.

During the early part of the year 1867, the Legislature of Pennsylvania, in a spirit of progress and improvement which entitles it to the thanks and gratitude of the community, altered the prevailing system of appointment of School Controllers.

Hitherto, they have been elected by and from the Boards of Sectional School Directors. Legislative enactment now requires that School Controllers, residents of the Wards respectively, shall be appointed by the Judiciary: It is contended by some, that this mode of appointment is an interference with the elective franchise of the people. The reply, however, to this is that the people have not hitherto at any time elected School Controllers, but they have been elected by the School Directors, who themselves are the direct appointees of the people. It is submitted, that the Judges are as much the appointees of the people as are the School Directors, and therefore the change has been simply in taking the power from one class of public appointees and giving it to another. It is doubtless a fact, that the new system meets with the cordial approbation

of the great mass of our people, and it is entitled to a full and fair trial before it shall meet with opposition.

In view of the fact, that the Annual Report has become the daily Manual of Controllers, Directors, and Teachers, it is essential, in order to supply their demands, and the daily calls for the Report at the hands of our City, State, and National authorities, and of our own citizens, as well as of those who are interested in educational affairs in all parts of the United States, Europe, and South America, that the edition should be large. It has been latterly found at the end of each year, that the edition has fallen short of the demand.

Ordinarily, the Annual Report should be confined to the fiscal year, ending 31st December. This year, however, in consequence of the thorough re-organization of the Board, under the Act of 1867, and the very great changes, alterations, modifications, and reforms, under the present organization, it has been deemed wise and judicious, that the Report, for convenience sake, should embrace those changes and alterations, which, as they are to govern the present year, should be made public in a form accessible to all.

Since the re-organization of the Board, the several Committees have been diligently at work, with the earnest desire of improving the course of study, and establishing uniformity of study throughout all the Schools of the District of the same grade; of revising and reducing the over-burdened Text-book list; of elevating the grades of the Grammar Schools; and of re-arranging the By-Laws and Rules for the regulation of this co-ordinate branch of the City Government; with what success will be apparent by an examination of the reports appended hereto.

Among the reforms, it will be found that what is ordinarily known as the *cramming process*, has been perhaps effectually and practically abolished by the prohibition of home study, and substituting therefor, study at school. The Teachers have been positively forbidden to allow school books to be taken home. It has been thought, and experience will yet show,

that two hours of attentive study, within the school walls, under the eye of the Teacher, will be of more service than the uncertain, irregular, thoughtless, and careless home study, liable at any moment to interruption by domestic calls and other demands. It is a fact, that comparatively few Public School children have proper facilities for home study. Most frequently, the study, (if study it may be called,) must be at the family fire-side, and amidst all the disquiet of the family sitting-room; the practical result being, that while the book may be in hand, the thoughts of the child are too frequently upon other subjects. It is safe to say, therefore, that two hours of attentive study, in school, are more than equivalent to all the hours of attempted study, which a pupil may be able to devote to that purpose at home. It is believed, also, that these two hours of afternoon school study will be sufficient for the various classes. The mornings will be devoted to the recitation of the lessons learned the previous day. It is hoped, therefore, that no longer will be uttered the well-founded complaint, that the labor of the Public School permanently impairs the physical condition of our children. Let the plan be fairly tried, and let the Teachers give it their hearty co-operation, as they certainly will, and marked success must follow.

An exception, however, has been made in the matter of home study, with respect to the Senior Classes of the Grammar Schools, and the Normal and High Schools.

The Senior Class is a new feature, calculated to benefit both the Normal, the High, and the Grammar Schools, and it will effectually prevent, it is hoped, the fearful competition for admission into the Normal and High Schools, injurious alike to the scholars and the whole educational interests of Philadelphia.

This Senior Class is designed for the introduction of such new studies as will better fit the scholars for the active and practical affairs of life. It will be under the charge of the Principal of the School. Semi-annual examinations will be required in all schools, in all grades. That Division heretofore known as

the First Division in the Grammar School, will become the Senior Class, and the Second Division will be elevated to the present standard of the First.

Upon the examinations referred to, the successful candidates in the new First Division will have the privilege of electing, whether to apply for admission to the High or the Normal School, or to join the Senior Class of the Grammar School. This privilege, however, will be restricted so far as the High and the Normal Schools are concerned, in consequence of the feature of *apportionment* being introduced, and each Grammar School will have the privilege of sending the proficient pupils to the High or the Normal School, the number depending upon the number of Divisions of the Grammar School.

The Report of the Committee on the Revision of Studies and Text-books, and the action of the Board thereon, will more fully exhibit the detail of the reforms referred to, and it is commended to the careful attention of all desirous of understanding fully the matter.

The By-Laws and Rules have, in like manner, undergone a most careful revision at the hands of the Revising Committee. All rules that have been deemed objectionable have been rescinded, and new features have been introduced, all tending to the public good.

The Financial Department of this Board has by no means been overlooked. The system hitherto prevailing, with regard to Printing, has been abolished, and the whole subject thrown open to public competition.

The Committee on Property have been paying due attention to the erection of the new school-houses, and to the repairs of the old. They have been firm in enforcing the full performance of contracts on the part of the Builders, and yet not seeking to benefit the City at the sacrifice of justice to the Builders. Contracts have been revised, and the mode of paying money has been somewhat altered.

These changes, in brief, form portions of the reform inaugurated, and improvements will not stop until the Controllers have exhausted every effort in the proper discharge of the high and responsible duties imposed upon them by law.

UNIFORM SUPERVISION OF SCHOOLS.

The time has arrived when the huge machinery of the Public School System of Philadelphia, requires the most careful action and delicate supervision. This is rendered doubly more important than ever before, as we have now established thorough uniformity in the studies pursued in the respective grades of all Schools. This machinery should be kept in running order; all its parts should move with regularity; the rules laid down should be adhered to by one and all, without variation or departure, else the system would become again disjointed, irregular, uncertain, and defective. If laws and rules are worth making, their rigid enforcement should be required. If useless, they should be expunged. The whole system requires a governing hand, one who has experience, tact, and executive ability, and in whom might be safely reposed confidence and regard, alike by Controllers, Directors, and Teachers. Philadelphia alone, of all large Cities, is without such supervision. Sectional or Ward Committees, it is true, supervise the Schools of the Wards under their own rules and regulations. But there is no one upon whom is charged the duties and responsibilities of supervising all the schools of Philadelphia as a connected body. The absence of a Superintendent of Schools in our city, has been commented upon with marked severity by educational men, at home and abroad, and to the want of this office has been attributed, to a considerable degree, many of the imperfections which have been charged against our school system. The Rev. Mr. Fraser, the Commissioner appointed by Her Britannic Majesty's "Schools Inquiry Commission," in speaking of the subject of supervision of schools, uses this language, "Superintendents are found to improve the discipline, give unity to the system,

and challenge to the utmost, the capacities of Teachers." "In the American cities, so far as I saw, *ex gratia*, in New York, New Haven, Hartford, Providence, Boston, Cincinnati, St. Louis, Chicago, and Detroit, superintendence of the schools was thoroughly vigorous and efficient. Strangely enough, there is no Superintendent of Schools in the great city of Philadelphia." Again he says: "I was astonished to find that in the great City of Philadelphia, with its 376 Schools, 1,278 Teachers, and 74,343 Scholars, there is no Superintendent." Mr. Fraser then quotes from Mr. White, the State Superintendent of Ohio, who, in speaking of an alleged inferiority of our lower grades of schools, says: "We think the explanation of this result is found largely in the fact that the schools of Philadelphia practically are without supervision. The supervision bestowed on the Cincinnati schools would soon work a wonderful change in those of Philadelphia. The omission is more remarkable, as supervision has formed a feature in the school organization of Pennsylvania for twelve years."

The Committee, to which the consideration of this subject was referred, has reported favorably, in these words:

"No plan of general education, the success of which depends upon the conduct of others, however solicitous these may be in the performance of their duties, can be complete without a supervisory head. We mean one who, having the confidence and affection of the teachers, shall act in harmony with them, ready and watchful to discover deficiencies in the system, and to recommend to the consideration of the Board such improvements as his own experience, and that of other cities, may from time to time suggest. Thus we should be constantly advised by one who, thoroughly accomplished in his duties, would be enabled to direct his whole attention to the large field of instruction covered by the schools of the First School District of Pennsylvania."

We may therefore expect, in the next annual report, to advise the community of the introduction of this feature into our new system, and to speak of its successful results.

TRANSFERS AND ADMISSIONS.

Under the new rules and regulations adopted by the present organization, it will be found that all the rules heretofore enacted, in respect to admissions and transfers, are abolished, except those which prevent withdrawal of pupils from one school, and their admission into another.

Perhaps nothing in our school system has been so productive of discord between teachers and directors of adjoining sections as those rules which compelled parents to send their children to schools within defined limits. To some extent these old rules have been adhered to, but to a large extent they were utterly disregarded. They are now abolished, and it rests with the parent, in the first instance, to select the school for his child.

For physical reasons, sometimes a long walk may be serviceable to the child, and in other cases a short walk might be absolutely essential; oftentimes, under the old rules, which required a director's transfer, this transfer was peremptorily refused, even though good and sufficient reasons were given by the parent; and the child was, of necessity, compelled to remain in the school, notwithstanding these reasons, or remain at home three months, or else the teacher of another school would violate the law by receiving him. While every discouragement should be thrown in the way of frequent and unnecessary changes of schools, yet practical experience has shown that, in very many cases, great good may result from such changes. Take the case of a child, for instance, who has taken a deep-seated prejudice against his teacher, for some imaginary offence, or some actual injustice, or for some whim or caprice. This prejudice, if continued, causes the child to be careless and indifferent, obstinate and unruly. His parents, in the belief that a change to some other school would actually benefit this child, even though he be wrong in his prejudices, apply for a transfer. It is refused; the child, more obstinate at the refusal, becomes more unruly; his parents become dissatisfied, and this very dissatisfaction supports and encourages the child, and the result is,

that the object and end of that school, so far as this child is concerned, fails in its effect, and thus the stringency of the rule impedes the child's real welfare.

Let the child be transferred to another school; he becomes satisfied, his parents are pleased, and nine times out of ten it will be found that he becomes diligent, studious, and attentive.

The object of this school is attained, society, in the end, has a better member, and besides all this, the school from which the child was transferred is improved in its discipline by the absence of the unruly one.

We shall find, that, by the abrogation of the old rules, there will be more harmony among teachers, schools, and directors. We shall, also, find that those schools which are held highest in public esteem, will always be full, with applicants in waiting; while inferior schools, for the time being, may suffer in their attendance, solely by reason of their inferiority. This must, necessarily, put School Directors on inquiry as to the cause, and they will soon ascertain where to apply the proper remedy, and how to elevate the school to a just standard. And thus, by degrees, we will perceive that the indifferent schools will be improved by reason of the abrogation of the rules referred to.

TEACHERS' EXAMINATIONS.

During the past year there have been two regular and two special examinations for teachers, with the following results :

	Number of applicants.	Number who received certificates
<i>First Regular Examination, held May 9th & 10th.</i>		
Applicants for 1st Class Certificates, - - -	6	2
do " 2d, 3d & 4th " " - - -	217	55
<i>Second Regular Examination, held November 14th & 15th.</i>		
Applicants for 1st Class Certificates, - - -	7	3
do " 2d, 3d & 4th " " - - -	223	125
<i>Special Examination for Principals of Unclassified Schools, held January 19, 1867. - -</i>	11	7
<i>Special Examination for Teachers of Colored Schools, held February 1st and 2d, 1867.</i>		
Certificates granted for 1st Class, - - - -		3
" " other Classes, - - - -		6
	464	201

It will doubtless be found hereafter, that the great difference between the numbers of those who succeed and those who fail, will be largely reduced, by reason of the regulation lately adopted by the Controllers, requiring each applicant from a Grammar School to present a certificate signed by the Principal, declaring that, in the judgment of the Principal, the applicant is prepared for the examination. This will keep away those who are clearly unfitted for the examination, and the Examiners will be saved the great and useless labor of critically inspecting thousands of pages of foolscap ; and it will prevent that mortification which invariably follows the want of success.

NEW SCHOOL HOUSES.

Much has been done during the past year, towards providing our children with fitting and healthful educational accommodations. Many lots have been secured for new School Houses, and many contracts have been entered into for the erection of the buildings. Several of them have been completed during the year, and they are now occupied. Thirty-three new school edifices have been contracted for, and most of them will be completed within the next six months—all of them during the present year. They have been erected in the most substantial manner; marked care and attention have been paid to ventilation, heating, and such other points as have been suggested by those in our own and other cities who are best informed in such matters, as desirable and necessary.

The *Millinery* and *Confectionery* of Architecture have been utterly ignored, while Architectural taste and propriety have been made subjects of careful study. Economy has marked the expenditure of the public funds, and our School Buildings will compare most favorably with those of any other city. They have been commended by School men, at home and from abroad, as models worthy the attention of all who desire appropriate accommodation for school children.

In order to do the fullest justice to the public in the expenditure of money, during the past year, the Committee of Property of this Board visited the Cities of Chicago, Milwaukee, St. Louis, and Columbus, that they might note the improvements in the mighty West. The authorities of these cities seemed to vie with each other in their efforts to forward the objects of this Committee, and it is but justice to say, that many of the new features which may be found in our edifices, are derived from this visit of inspection. The authorities of the cities named, welcomed the Committee with the kindest hospitality. And it may be truly said, that while they did welcome the coming, they did not speed the parting guests from their midst.

This interchange of visits, such as those referred to, between educational bodies, when they are made with the *bona fide* intent of subserving the public interests, must be productive of great good. And if this be so, *a fortiori*, would not occasional exchange of visits between *Teachers* of different cities, be productive of still more beneficial results? When we follow in a beaten track, and continue in it for any great length of time, we are apt to become fixed in our ways, and to believe that changes are unwise and inexpedient, and therefore we are not so ready to adopt, take, or appreciate the improvements in educational matters, made by others of equal or greater experience.

Occasional interchanges of visits would most probably awaken us from this self-sufficient condition, to the advantage of our educational interests.

Accompanying this Report will be found neatly engraved elevations and plans of nearly all the School Houses under contract and completed. It is impossible to enter into a minute description of each. For the benefit of the cause at home and abroad, we present these plates. All who are interested in the details, can examine the enlarged drawings and minute specifications at the office of this Board.

It must be remarked, that the demand for new School Houses was made upon City Councils in the year 1864, and the estimates were based upon the price of labor and materials at that time, and the number of children then registered. After considerable delay, Councils granted one million of dollars, but most unfortunately clogged the Ordinance with a proviso, making it a dead letter, that the Loan to be created for School Buildings should not be issued at less than par, being about five per cent. more than the current selling rates. Thus the loan was ineffectual; the prices of labor and material gradually increased. Strenuous but unsuccessful efforts were made at the time, to have the clog removed, by issuing loan warrants to contractors at par, so that the buildings could be erected at

once. At length the loan reached the par value, and the City saved the five per cent. difference; but, by that time, labor and materials had so greatly advanced, that the City lost about thirty per cent. upon the million. This Board was in no wise in fault for this, and it would be unjust to complain of Councils for not being able to anticipate the future cost of labor and materials, or for requiring the loan to be issued at par, according to law, and no complaint is made. The subject is introduced only to advise Councils and the community why it is that an occasional extra appropriation is needed, in order to aid us in our school building operations, and thus, to prevent that fault-finding so common on the part of those who will not enquire for the truth, and who do not wish to know it.

We can fairly say to the community, that the new School Houses are built upon the best plans, and are suited to our wants, and they have been erected with marked economy; and that the Controllers are exercising all the care and attention possible to bestow upon the subject, at great sacrifice of their time. If difficulties occur with contractors now and then, let it be borne in mind that the Controllers cannot *select* the contractors; they must by law give the contract to the *lowest bidder*, not to the lowest and *best* bidder.

BOYS' CENTRAL HIGH SCHOOL.

The Report of the esteemed Principal of this School, accompanying this Report, will be read with very great interest by all who favor public education, and a perusal of it is especially commended to all. Harmony, that essential feature of progress and success, now prevails throughout the entire institution. It has been thoroughly re-organized in its course of study, it is infinitely more practical than heretofore, and it is better calculated than ever before to benefit its pupils in the practical affairs of life. Other improvements are in contemplation, having in view an increased effectiveness. Mr. Riché has brought into the

duties of his office marked intelligence, a high order of administrative ability, and an energy and zeal for the welfare of the Institution, which have placed it, and which will keep it, in a high position among similar schools in the land. The most entire accord prevails among the Faculty. The pupils of the School have been brought to a condition of subordination, and are entitled to public commendation of their conduct and scholarship.

GIRLS' NORMAL SCHOOL.

The success and popularity of this institution, referred to in previous reports, continue. Distinguished visitors from abroad, as well as those from various parts of our land, continue to speak of it in terms of glowing praise. The proficiency of its pupils, their zealous attention to their duties, and their regard for the discipline of the institution, entitle them to special words of commendation. During the past year, sixty-five of its pupils have graduated with distinguished honor, and at the last Commencement, not only did every pupil of Class A graduate with diploma in hand, well earned after careful toil and study, but they also received, after a severe examination under the auspices of the Committee on Qualifications of Teachers, their Certificates which authorized them to teach in the Public Schools of this city. It is plain that the examination on which these Certificates are granted is the most severe trial to which a Scholar may be subjected, and it is gratifying to note that, not only did every graduate of Class A, thirty-two in number, receive a Certificate, but at the same examinations, during the past year, no less than one hundred and thirty in all received Certificates of Qualification ; some of them having been in the School only one year, some two years, and some three years. So long as we are able to retain the present Principal and his admirable corps of assistant laborers, who now reflect so much honor upon the institution, so long may we be assured that the Normal School, as it is to be called hereafter, will continue in

its tide of prosperity, and challenge the admiration of all who visit it, and that it will be the means of keeping up the supply of able Teachers for the Public Schools of Philadelphia.

Common justice demands that the talent in the corps of Teachers in this Institution should receive better remuneration.

Six hundred and fifty dollars a year for such talent, zeal, and energy, and for such success, is beneath the dignity of a City like Philadelphia. The compensation of the Faculty in this Institution should be increased. We have already lost marked talent in the Faculty, by reason of inadequacy of salaries, and we are not willing to lose more of that talent without at least the open and avowed effort of this Board to prevent it, by awarding to the zealous laborers a due return.

Within the past few weeks, this school has been named the "Normal School," the word "High" having been stricken out as being erroneously placed in the title. The design of the institution is to make it what its name now imports, a School for the Education of Teachers. It will hereafter appear that the Board of Control has by law the right to establish a Model School. The institution needs such a department as an essential part and parcel of its Normal character, and yet the financial restrictions imposed by Councils have thus far prevented this Board from engrafting this essential feature upon the Normal system. A Training or Model School is an absolute necessity to every well organized Normal establishment. We are without it. Our institution suffers from the want; its effectiveness is marred because we have not the financial ability to carry out the duty which the law enjoins upon us.

The present Normal School is utterly inadequate to supply the growing demand. The doors are opened wide to the public. The children of our citizens appeal for admittance, having earned, through a long course of Public School instruction, the right to enter, and yet semi-annually we are compelled to reject fifty per cent. of those who are entitled to be admitted.

The School is crowded to its utmost capacity ; its classes are already too large ; every seat is occupied. The Normal School accommodations of Philadelphia are proportionally inferior to those of any other large city in the United States. Boston, with its twenty-six thousand Public School children, affords accommodation for about four hundred Normal Scholars, while Philadelphia with its eighty thousand, accommodates no more than three hundred and sixty. This should not be, and it shall not be, with the sanction of this Board. We have appealed, and we shall continue to appeal, until there is accorded to us sufficient accommodation for those who desire to teach, and for the establishment of a Training School.

JANITORS' DUTIES.

A very large sum of money is annually appropriated for those whose duty it is to care for the cleanliness of our school houses ; and we have a right to expect and demand, that these duties shall be well, promptly, and efficiently performed.

In some instances, the Janitors seem faithful and just in the performance of their duties, and of them no complaint can be uttered. But in very many instances, Janitors have rendered themselves open to rebuke and censure for the utter neglect of all their duties, save that of drawing their salaries. Dirty school houses, with unwashed floors and windows, and untidy yards, dirt being the rule rather than the exception, are too frequent in this city. This matter has been heretofore complained of by this Board, and unless instantly corrected, it will become the subject of the most stringent resolutions. If Janitors continue thus faithless to their duties, it may become the duty of this Board to place others in their stead. This would be an exercise of the legitimate authority of the Board, which it would be loth to exercise, except in cases of absolute necessity. The Janitor contracts, by accepting the appointment, to perform all the duties of his office, and the City contracts to pay him a definite salary ; if he fails on his part, he certainly

its tide of prosperity, and challenge the admiration of all who visit it, and that it will be the means of keeping up the supply of able Teachers for the Public Schools of Philadelphia.

Common justice demands that the talent in the corps of Teachers in this Institution should receive better remuneration.

Six hundred and fifty dollars a year for such talent, zeal, and energy, and for such success, is beneath the dignity of a City like Philadelphia. JANITORS' DUTIES.

A very large sum of money is annually appropriated for those whose duty it is to care for the cleanliness of our school houses, and we have a right to expect and demand, that these duties shall be well, promptly, and efficiently performed.

In some instances, the Janitors seem faithful and diligent in the performance of their duties, and of them no complaint can be uttered. But in very many instances, Janitors have considered themselves open to rebuke and censure for the neglect of all their duties, save that of drawing their salaries. Dirty school houses, with unwashed floors and windows, and untidy yards, dirt being the rule rather than the exception, are too frequent in this city. This matter has been repeatedly complained of by this Board, and unless instant measures be taken, it will become the subject of the most stringent resolutions. If Janitors continue thus faithless to their duties, it will become the duty of this Board to place others in their stead. It will be an exercise of the legitimate authority of the Board, and it would be loth to exercise, except in case of absolute necessity. The Janitor contracts, by accepting the appointment, to perform all the duties of his office, and the Board is bound to pay him a definite salary; if he fails to do so, he is not entitled to

does not earn his compensation, and this Board will be justified in withholding the pay, and perhaps forfeiting it for breach of contract.

It would be well for this Board to establish a system of supervision in respect to the cleanliness of School Houses, unless indeed, the Teachers and Directors would themselves exercise that vigilance upon the subject, which may be reasonably expected at their hands. It would be well also, for this Board, most emphatically, to define the duties of Janitors in detail, and to require that the Teachers should certify, in their Quarterly Reports, whether the duties have been faithfully performed or not. The appointment of Janitors by the Sectional Boards has been by permission of this Board, and not by virtue of any vested authority in the Directors. If they who are supposed to be constantly on visits of inspection, would exercise some care in respect to the neatness of school houses under their charge, further action on the part of this Board would be rendered unnecessary.

TEACHERS' INSTITUTE.

The Teachers of Philadelphia have organized themselves, during the past year, into corporate existence, for the purpose of self-improvement, and for the elevation of their profession. They have secured the ablest lecturers in the land for their improvement in matters of general education. The course was a complete success. The Institute has established Elocutionary classes, formed a Historical class, a Mathematical class, a class in the French language, and one in Geography and Astronomy; they have ordered discussions on Educational topics; they have had Essays prepared and read to them, of practical advantage to their profession. They are engaged in establishing a Teachers' Library, and they are considering and discussing other means of general utility in school matters. This institution is entitled to our warmest support, and to the confidence and support of the entire community.

Already its members number nine hundred, and it is to be regretted that the residue of our Teachers, about five hundred, have not seen fit to unite with their colleagues in so good a cause. Some of them, residing at a distance, are perhaps excusable, but not so with those who may conveniently attend the Institute.

In this and other States, there are laws that require Teachers to join County Institutes, under forfeitures. This rigor is scarcely needed here, and yet it would be wise that, hereafter, in the selection of Teachers by the Sectional Boards, preference should be given to members of the Teachers' Institute, for the reason that they, who show so much interest in the advancement of their profession, may fairly be presumed to have that profession and the good of the schools closer at heart, and therefore, to be more worthy of position than others.

SCHOOL STATISTICS.

The School Statistics heretofore presented in our late Annual Reports, have proved of much service in the cause of public education, especially in the Southern States; and so far as we have been advised, they have not been questioned, except by the Rev. Mr. Fraser, of Her Britannic Majesty's School Commission, who has misconceived the basis of calculation, and is himself in error. Of so much value have they proved, that we have again secured the valuable services of Wm. Henry Parker, Esq., the Principal of the Ringgold Grammar School, who has prepared his elaborate tables with great care, and has brought them into a more complete form: he has also added new tables.

They all show that Philadelphia educates her children at a lower cost than any other large City in the United States, and does so at the sacrifice of justice to her Teachers.

Mr. Parker has furnished the following notes, which are explanatory of the tables:

REMARKS UPON THE TABLES.

The Comparative Tables appended correspond with those contained in the Report of last year. There have been some alterations in the manner of presenting a comparison of the School Statistics of the chief cities of the United States, with a view to improvement.

We must again take notice of the facts, that there is no uniform system of collecting the statistics of Schools in cities, and that the averages and per centages contained in reports of different cities, are not reliable *for the purpose of comparison*, unless they are calculated upon *the same basis*.

For example, the cost of tuition per pupil, the cost per pupil for incidentals, the whole cost per scholar, and other similar averages, are usually calculated upon the *average number of pupils belonging*, certainly the fairest basis, all things considered. But in Philadelphia, the "average number of pupils belonging" has never been one of the items of statistics reported to the Board of Controllers; its Secretary is the only officer in Philadelphia having an opportunity of collecting and summing up the figures returned, (there being no Superintendent in Philadelphia, as in other cities large or small, with but few exceptions,) and the Secretary has multifarious duties devolving upon him, which prevent him from devoting time and attention to the subject, and from digesting and perfecting a plan for uniformity, as has been done by Superintendents in other cities.

It results, therefore, that, in collating the reports of the cities for the especial purpose of comparing them with the statistics of Philadelphia, and the cost of the School system here, some other basis must be selected. The *average daily attendance* is given in almost all reports, so that has been taken as the divisor in calculating the cost per scholar for the various items of expenditure, wherever a comparison with other cities is made. In some cases, other bases are also used.

A misapprehension on this point, has made the Rev. J. Fraser, A. M., of the "Schools Inquiry Commissions" appointed

by the Queen of England, in his "Report on the Common School System of the United States, and of the Provinces of Upper and Lower Canada," (a Parliamentary Blue Book of 1867,) contest the cost of the Boston Schools, as given in the Report of the Controllers of Philadelphia for 1864.

He gives, on page 56, a table for eleven Cities and two States, of the average cost in all the Schools for tuition only, and for whole expenditure, and the cost in High Schools, in Grammar Schools, and in Primary Schools. For Boston, he gives the average cost for "tuition only," \$12 04. At the head of his table he refers to a foot note, which is, in part, as follows :

" See 46th Philadelphia Report, p. 19; 22d Detroit Report, p. 38. In the Philadelphia calculations, the cost of the Boston Schools in the first column is set down at \$15 71. I have taken my figures from the Report of the Boston Superintendent for 1864 (p. 129), which I have verified." The rest of the note refers to the value of the dollar in English money.

Mr. Fraser errs, not only on this point, but on others.

The "Boston Superintendent" takes the *average number belonging* as his basis, at least he did so in 1861, in 1863, in 1865, in 1866, and in 1867, (the reports for 1862 and 1864 are not at hand); the 46th Philadelphia Report, that for 1864, gives the cost per pupil in Boston for 1863, "from average attendance during the year," "24,580 pupils," for tuition, \$12 64; for Books and Stationery, \$0 00; for Incidentals, \$4 70; for Permanent Improvements, *a blank* (the cost not being given in the Boston Report for 1863, although money was spent for the purpose); and for total cost on "Average Attendance," \$17 34; it also gives for Boston, for the same year, 1863, the cost per pupil "From *number belonging at end of year*," "27,131 pupils;" for Tuition, \$11 45; for Books and Stationery, \$0 00, for Incidentals, \$4 26; for Permanent Improvements, —; and for *total cost* (not for tuition only), \$15 71.

As the sums of money and the numbers of pupils are set down in the 46th Philadelphia Report, from which he takes his other figures, he might easily "have verified" the figures given, as well as those of the Boston Superintendent.

He has erred in taking the figures of 1863 for those of 1864 ; in taking whole cost (excluding the omitted items of Permanent Improvements, under the Philadelphia classification of Items of Expenses,) for cost of Tuition only ; and in taking the calculation on the whole number of pupils at the end of the year, as if it were on the "average number belonging." Serious errors to be made by one taking exception to our figures.

In no case have the averages given by Superintendents been copied into the comparative tables appended to this Report. In all cases they have been calculated from bases made to correspond, as nearly as possible, where sufficient data were found in the reports, with those usual in Philadelphia.

As the intention was to compare the cost of the school system of Philadelphia with the cost in other cities, and as the data of other cities corresponding, and those only, have been taken, thus reducing all to one uniform standard, of course it follows that these tables are reliable for the comparison of all these cities, one with another.

An estimated *average whole number belonging* in Philadelphia, has been introduced, for the purpose of further comparison, but it may not be correct.

The cost per pupil in Philadelphia, on each separate item of expenditure, has been calculated on the average daily attendance, on the number of pupils belonging at the end of the year, and also on the whole number of pupils enrolled or registered during the year. It should be remarked, that this last number includes re-enrolments.

The New York Report gives, in four different places, differing figures for whole number taught or enrolled, and for average attendance. Of course, different divisors give differing quotients or averages. The extremes are given.

The New Orleans Report gives numbers for a year, and for a certain six months of that year. These differ so much that both are given, with the differing results.

Some of the tables, (for instance, that of the comparison of Evening Schools,) show many blanks. It was impossible to make them fuller from data contained in the reports. Some tables were begun but were abandoned, on account of the lack of corresponding information in the reports, among masses of details on other points. The one referred to is given, with a view of showing *how little* is reported in some instances, rather than *how much*. The Providence Report, for example, gives scarcely any figures for comparison.

From some cities no reports were received, although they were requested.

In making the comparison for the Cities and Boroughs of Pennsylvania, it was necessary, in order to make a fair comparison, to take the rates per month into consideration, instead of those per year, for the reason that the schools are open for terms of differing numbers of months. The term, except in Philadelphia, must by law be at least four months, and must not exceed ten months.

The monthly rate makes the expense for buildings in some boroughs seem very great; for instance, in Franklin and in Oil City, where there are a rapid increase of population and a necessity for new buildings, and where the term is made short on account of the amount of money appropriated for buildings being so large.

The rate per month seemed, however, to be the only one that would give a fair basis for comparison.

COST OF EDUCATION.

The following tables exhibit the detailed cost of Public School education in Philadelphia during the past year, upon the several bases referred to, so that Philadelphia may be compared with any other city which adopts one or the other of these principles

once. At length the loan reached the par value, and the City saved the five per cent. difference; but, by that time, labor and materials had so greatly advanced, that the City lost about thirty per cent. upon the million. This Board was in no wise in fault for this, and it would be unjust to complain of Councils for not being able to anticipate the future cost of labor and materials, or for requiring the loan to be issued at par, according to law, and no complaint is made. The subject is introduced only to advise Councils and the community why it is that an occasional extra appropriation is needed, in order to aid us in our school building operations, and thus, to prevent that fault-finding so common on the part of those who will not enquire for the truth, and who do not wish to know it.

We can fairly say to the community, that the new School Houses are built upon the best plans, and are suited to our wants, and they have been erected with marked economy; and that the Controllers are exercising all the care and attention possible to bestow upon the subject, at great sacrifice of their time. If difficulties occur with contractors now and then, let it be borne in mind that the Controllers cannot *select* the contractors; they must by law give the contract to the *lowest bidder*, not to the lowest and *best* bidder.

BOYS' CENTRAL HIGH SCHOOL.

The Report of the esteemed Principal of this School, accompanying this Report, will be read with very great interest by all who favor public education, and a perusal of it is especially commended to all. Harmony, that essential feature of progress and success, now prevails throughout the entire institution. It has been thoroughly re-organized in its course of study, it is infinitely more practical than heretofore, and it is better calculated than ever before to benefit its pupils in the practical affairs of life. Other improvements are in contemplation, having in view an increased effectiveness. Mr. Riché has brought into the

duties of his office marked intelligence, a high order of administrative ability, and an energy and zeal for the welfare of the Institution, which have placed it, and which will keep it, in a high position among similar schools in the land. The most entire accord prevails among the Faculty. The pupils of the School have been brought to a condition of subordination, and are entitled to public commendation of their conduct and scholarship.

GIRLS' NORMAL SCHOOL.

The success and popularity of this institution, referred to in previous reports, continue. Distinguished visitors from abroad, as well as those from various parts of our land, continue to speak of it in terms of glowing praise. The proficiency of its pupils, their zealous attention to their duties, and their regard for the discipline of the institution, entitle them to special words of commendation. During the past year, sixty-five of its pupils have graduated with distinguished honor, and at the last Commencement, not only did every pupil of Class A graduate with diploma in hand, well earned after careful toil and study, but they also received, after a severe examination under the auspices of the Committee on Qualifications of Teachers, their Certificates which authorized them to teach in the Public Schools of this city. It is plain that the examination on which these Certificates are granted is the most severe trial to which a Scholar may be subjected, and it is gratifying to note that, not only did every graduate of Class A, thirty-two in number, receive a Certificate, but at the same examinations, during the past year, no less than one hundred and thirty in all received Certificates of Qualification ; some of them having been in the School only one year, some two years, and some three years. So long as we are able to retain the present Principal and his admirable corps of assistant laborers, who now reflect so much honor upon the institution, so long may we be assured that the Normal School, as it is to be called hereafter, will continue in

its tide of prosperity, and challenge the admiration of all who visit it, and that it will be the means of keeping up the supply of able Teachers for the Public Schools of Philadelphia.

Common justice demands that the talent in the corps of Teachers in this Institution should receive better remuneration.

Six hundred and fifty dollars a year for such talent, zeal, and energy, and for such success, is beneath the dignity of a City like Philadelphia. The compensation of the Faculty in this Institution should be increased. We have already lost marked talent in the Faculty, by reason of inadequacy of salaries, and we are not willing to lose more of that talent without at least the open and avowed effort of this Board to prevent it, by awarding to the zealous laborers a due return.

Within the past few weeks, this school has been named the "Normal School," the word "High" having been stricken out as being erroneously placed in the title. The design of the institution is to make it what its name now imports, a School for the Education of Teachers. It will hereafter appear that the Board of Control has by law the right to establish a Model School. The institution needs such a department as an essential part and parcel of its Normal character, and yet the financial restrictions imposed by Councils have thus far prevented this Board from engrafting this essential feature upon the Normal system. A Training or Model School is an absolute necessity to every well organized Normal establishment. We are without it. Our institution suffers from the want; its effectiveness is marred because we have not the financial ability to carry out the duty which the law enjoins upon us.

The present Normal School is utterly inadequate to supply the growing demand. The doors are opened wide to the public. The children of our citizens appeal for admittance, having earned, through a long course of Public School instruction, the right to enter, and yet semi-annually we are compelled to reject fifty per cent. of those who are entitled to be admitted.

The School is crowded to its utmost capacity ; its classes are already too large ; every seat is occupied. The Normal School accommodations of Philadelphia are proportionally inferior to those of any other large city in the United States. Boston, with its twenty-six thousand Public School children, affords accommodation for about four hundred Normal Scholars, while Philadelphia with its eighty thousand, accommodates no more than three hundred and sixty. This should not be, and it shall not be, with the sanction of this Board. We have appealed, and we shall continue to appeal, until there is accorded to us sufficient accommodation for those who desire to teach, and for the establishment of a Training School.

JANITORS' DUTIES.

A very large sum of money is annually appropriated for those whose duty it is to care for the cleanliness of our school houses ; and we have a right to expect and demand, that these duties shall be well, promptly, and efficiently performed.

In some instances, the Janitors seem faithful and just in the performance of their duties, and of them no complaint can be uttered. But in very many instances, Janitors have rendered themselves open to rebuke and censure for the utter neglect of all their duties, save that of drawing their salaries. Dirty school houses, with unwashed floors and windows, and untidy yards, dirt being the rule rather than the exception, are too frequent in this city. This matter has been heretofore complained of by this Board, and unless instantly corrected, it will become the subject of the most stringent resolutions. If Janitors continue thus faithless to their duties, it may become the duty of this Board to place others in their stead. This would be an exercise of the legitimate authority of the Board, which it would be loth to exercise, except in cases of absolute necessity. The Janitor contracts, by accepting the appointment, to perform all the duties of his office, and the City contracts to pay him a definite salary ; if he fails on his part, he certainly

does not earn his compensation, and this Board will be justified in withholding the pay, and perhaps forfeiting it for breach of contract.

It would be well for this Board to establish a system of supervision in respect to the cleanliness of School Houses, unless indeed, the Teachers and Directors would themselves exercise that vigilance upon the subject, which may be reasonably expected at their hands. It would be well also, for this Board, most emphatically, to define the duties of Janitors in detail, and to require that the Teachers should certify, in their Quarterly Reports, whether the duties have been faithfully performed or not. The appointment of Janitors by the Sectional Boards has been by permission of this Board, and not by virtue of any vested authority in the Directors. If they who are supposed to be constantly on visits of inspection, would exercise some care in respect to the neatness of school houses under their charge, further action on the part of this Board would be rendered unnecessary.

TEACHERS' INSTITUTE.

The Teachers of Philadelphia have organized themselves, during the past year, into corporate existence, for the purpose of self-improvement, and for the elevation of their profession. They have secured the ablest lecturers in the land for their improvement in matters of general education. The course was a complete success. The Institute has established Elocutionary classes, formed a Historical class, a Mathematical class, a class in the French language, and one in Geography and Astronomy; they have ordered discussions on Educational topics; they have had Essays prepared and read to them, of practical advantage to their profession. They are engaged in establishing a Teachers' Library, and they are considering and discussing other means of general utility in school matters. This institution is entitled to our warmest support, and to the confidence and support of the entire community.

Already its members number nine hundred, and it is to be regretted that the residue of our Teachers, about five hundred, have not seen fit to unite with their colleagues in so good a cause. Some of them, residing at a distance, are perhaps excusable, but not so with those who may conveniently attend the Institute.

In this and other States, there are laws that require Teachers to join County Institutes, under forfeitures. This rigor is scarcely needed here, and yet it would be wise that, hereafter, in the selection of Teachers by the Sectional Boards, preference should be given to members of the Teachers' Institute, for the reason that they, who show so much interest in the advancement of their profession, may fairly be presumed to have that profession and the good of the schools closer at heart, and therefore, to be more worthy of position than others.

SCHOOL STATISTICS.

The School Statistics heretofore presented in our late Annual Reports, have proved of much service in the cause of public education, especially in the Southern States; and so far as we have been advised, they have not been questioned, except by the Rev. Mr. Fraser, of Her Britannic Majesty's School Commission, who has misconceived the basis of calculation, and is himself in error. Of so much value have they proved, that we have again secured the valuable services of Wm. Henry Parker, Esq., the Principal of the Ringgold Grammar School, who has prepared his elaborate tables with great care, and has brought them into a more complete form: he has also added new tables.

They all show that Philadelphia educates her children at a lower cost than any other large City in the United States, and does so at the sacrifice of justice to her Teachers.

Mr. Parker has furnished the following notes, which are explanatory of the tables:

does not earn his compensation, and this Board will be justified in withholding the pay, and perhaps forfeiting it for breach of contract.

It would be well for this Board to establish a system of supervision in respect to the cleanliness of School Houses, unless indeed, the Teachers and Directors would themselves exercise that vigilance upon the subject, which may be reasonably expected at their hands. It would be well also, for this Board, most emphatically, to define the duties of Janitors in detail, and to require that the Teachers should certify, in their Quarterly Reports, whether the duties have been faithfully performed or not. The appointment of Janitors by the Sectional Boards has been by permission of this Board, and not by virtue of any vested authority in the Directors. If they who are supposed to be constantly on visits of inspection, would exercise some care in respect to the neatness of school houses under their charge, further action on the part of this Board would be rendered unnecessary.

TEACHERS' INSTITUTE.

The Teachers of Philadelphia have organized themselves, during the past year, into corporate existence, for the purpose of self-improvement, and for the elevation of their profession. They have secured the ablest lecturers in the land for their improvement in matters of general education. The course was a complete success. The Institute has established Elocutionary classes, formed a Historical class, a Mathematical class, a class in the French language, and one in Geography and Astronomy; they have ordered discussions on Educational topics; they have had Essays prepared and read to them, of practical advantage to their profession. They are engaged in establishing a Teachers' Library, and they are considering and discussing other means of general utility in school matters. This institution is entitled to our warmest support, and to the confidence and support of the entire community.

Already its members number nine hundred, and it is to be regretted that the residue of our Teachers, about five hundred, have not seen fit to unite with their colleagues in so good a cause. Some of them, residing at a distance, are perhaps excusable, but not so with those who may conveniently attend the Institute.

In this and other States, there are laws that require Teachers to join County Institutes, under forfeitures. SCHOOL STATISTICS.

The School Statistics heretofore presented in our late Annual Reports, have proved of much service in the cause of public education, especially in the Southern States; and so far as we have been advised, they have not been questioned, except by the Rev. Mr. Fraser, of Her Britannic Majesty's School Commission, who has misconceived the basis of calculation, and is himself in error. Of so much value have they proved, that we have again secured the valuable services of Wm. Henry Parker, Esq., the Principal of the Ringgold Grammar School, who has prepared his elaborate tables with great care, and has brought them into a more complete form: he has also added new tables.

They all show that Philadelphia educates her children at a lower cost than any other large City in the United States, and does so at the sacrifice of justice to her Teachers.

Mr. Parker has furnished the following notes, which are explanatory of the tables:

REMARKS UPON THE TABLES.

The Comparative Tables appended correspond with those contained in the Report of last year. There have been some alterations in the manner of presenting a comparison of the School Statistics of the chief cities of the United States, with a view to improvement.

We must again take notice of the facts, that there is no uniform system of collecting the statistics of Schools in cities, and that the averages and per centages contained in reports of different cities, are not reliable *for the purpose of comparison*, unless they are calculated upon *the same basis*.

For example, the cost of tuition per pupil, the cost per pupil for incidentals, the whole cost per scholar, and other similar averages, are usually calculated upon the *average number of pupils belonging*, certainly the fairest basis, all things considered. But in Philadelphia, the "average number of pupils belonging" has never been one of the items of statistics reported to the Board of Controllers; its Secretary is the only officer in Philadelphia having an opportunity of collecting and summing up the figures returned, (there being no Superintendent in Philadelphia, as in other cities large or small, with but few exceptions,) and the Secretary has multifarious duties devolving upon him, which prevent him from devoting time and attention to the subject, and from digesting and perfecting a plan for uniformity, as has been done by Superintendents in other cities.

It results, therefore, that, in collating the reports of the cities for the especial purpose of comparing them with the statistics of Philadelphia, and the cost of the School system here, some other basis must be selected. The *average daily attendance* is given in almost all reports, so that has been taken as the divisor in calculating the cost per scholar for the various items of expenditure, wherever a comparison with other cities is made. In some cases, other bases are also used.

A misapprehension on this point, has made the Rev. J. Fraser, A. M., of the "Schools Inquiry Commissions" appointed

by the Queen of England, in his "Report on the Common School System of the United States, and of the Provinces of Upper and Lower Canada," (a Parliamentary Blue Book of 1867,) contest the cost of the Boston Schools, as given in the Report of the Controllers of Philadelphia for 1864.

He gives, on page 56, a table for eleven Cities and two States, of the average cost in all the Schools for tuition only, and for whole expenditure, and the cost in High Schools, in Grammar Schools, and in Primary Schools. For Boston, he gives the average cost for "tuition only," \$12 04. At the head of his table he refers to a foot note, which is, in part, as follows :

" See 46th Philadelphia Report, p. 19; 22d Detroit Report, p. 38. In the Philadelphia calculations, the cost of the Boston Schools in the first column is set down at \$15 71. I have taken my figures from the Report of the Boston Superintendent for 1864 (p. 129), which I have verified." The rest of the note refers to the value of the dollar in English money.

Mr. Fraser errs, not only on this point, but on others.

The "Boston Superintendent" takes the *average number belonging* as his basis, at least he did so in 1861, in 1863, in 1865, in 1866, and in 1867, (the reports for 1862 and 1864 are not at hand); the 46th Philadelphia Report, that for 1864, gives the cost per pupil in Boston *for 1863*, "from average attendance during the year," "24,580 pupils," for tuition, \$12 64; for Books and Stationery, \$0 00; for Incidentals, \$4 70; for Permanent Improvements, *a blank* (the cost not being given in the Boston Report for 1863, although money was spent for the purpose); and for total cost on "Average Attendance," \$17 34; it also gives for Boston, for the same year, 1863, the cost per pupil "From *number belonging at end of year*," "27,131 pupils;" for Tuition, \$11 45; for Books and Stationery, \$0 00, for Incidentals, \$4 26; for Permanent Improvements, —; and for *total cost* (not for tuition only), \$15 71.

As the sums of money and the numbers of pupils are set down in the 46th Philadelphia Report, from which he takes his other figures, he might easily "have verified" the figures given, as well as those of the Boston Superintendent.

He has erred in taking the figures of 1863 for those of 1864; in taking whole cost (excluding the omitted items of Permanent Improvements, under the Philadelphia classification of Items of Expenses,) for cost of Tuition only; and in taking the calculation on the whole number of pupils at the end of the year, as if it were on the "average number belonging." Serious errors to be made by one taking exception to our figures.

In no case have the averages given by Superintendents been copied into the comparative tables appended to this Report. In all cases they have been calculated from bases made to correspond, as nearly as possible, where sufficient data were found in the reports, with those usual in Philadelphia.

As the intention was to compare the cost of the school system of Philadelphia with the cost in other cities, and as the data of other cities corresponding, and those only, have been taken, thus reducing all to one uniform standard, of course it follows that these tables are reliable for the comparison of all these cities, one with another.

An estimated *average whole number belonging* in Philadelphia, has been introduced, for the purpose of further comparison, but it may not be correct.

The cost per pupil in Philadelphia, on each separate item of expenditure, has been calculated on the average daily attendance, on the number of pupils belonging at the end of the year, and also on the whole number of pupils enrolled or registered during the year. It should be remarked, that this last number includes re-enrolments.

The New York Report gives, in four different places, differing figures for whole number taught or enrolled, and for average attendance. Of course, different divisors give differing quotients or averages. The extremes are given.

The New Orleans Report gives numbers for a year, and for a certain six months of that year. These differ so much that both are given, with the differing results.

Some of the tables, (for instance, that of the comparison of Evening Schools,) show many blanks. It was impossible to make them fuller from data contained in the reports. Some tables were begun but were abandoned, on account of the lack of corresponding information in the reports, among masses of details on other points. The one referred to is given, with a view of showing *how little* is reported in some instances, rather than *how much*. The Providence Report, for example, gives scarcely any figures for comparison.

From some cities no reports were received, although they were requested.

In making the comparison for the Cities and Boroughs of Pennsylvania, it was necessary, in order to make a fair comparison, to take the rates per month into consideration, instead of those per year, for the reason that the schools are open for terms of differing numbers of months. The term, except in Philadelphia, must by law be at least four months, and must not exceed ten months.

The monthly rate makes the expense for buildings in some boroughs seem very great; for instance, in Franklin and in Oil City, where there are a rapid increase of population and a necessity for new buildings, and where the term is made short on account of the amount of money appropriated for buildings being so large.

The rate per month seemed, however, to be the only one that would give a fair basis for comparison.

COST OF EDUCATION.

The following tables exhibit the detailed cost of Public School education in Philadelphia during the past year, upon the several bases referred to, so that Philadelphia may be compared with any other city which adopts one or the other of these principles

of calculation. Perhaps the most just table for public examination, is that which takes for its basis the average daily attendance during the year.

The following table recapitulates the total cost per pupil per annum, and per diem, on the three modes :

	AVERAGE DAILY ATTENDANCE.		NUMBER BELONGING AT END OF YEAR.		NUMBER TAUGHT.	
	Cost per pupil per annum.	Cost per pupil per diem.	Cost per pupil per annum.	Cost per pupil per diem.	Cost per pupil per annum.	Cost per pupil per diem.
High School.	\$78 20	\$0.20 $\frac{8}{100}$	\$74 97	\$0.20 $\frac{54}{100}$	\$45 05	\$0.12 $\frac{50}{100}$
Normal "	95 05	0.09 $\frac{85}{100}$	85 65	0.09 $\frac{77}{100}$	25 37	0.06 $\frac{95}{100}$
Grammar, Unclassified, Secondary, & Primary Schools. }	14 91	0.04 $\frac{8}{100}$	12 92	0.03 $\frac{54}{100}$	7 73	0.02 $\frac{13}{100}$
All grades.	15 16	0.04 $\frac{22}{100}$	13 54	0.03 $\frac{77}{100}$	8 14	0.02 $\frac{24}{100}$

It is greatly to be regretted that there is so much diversity in the statistical bases of the reports of the various Educational Boards. If all would agree upon a common basis and uniform character of tables, it would be easy to prepare, with great accuracy, comparative tables of cost, &c. In the absence of such uniformity, Mr. Parker has been at great labor in dissecting annual reports, and he has been compelled to make his computations in several forms.

One is based upon the average daily attendance during the year, another upon the number of pupils belonging to the Schools at the end of the year, and another upon the number taught during the year.

Tables E and F will exhibit the relative expenses in twenty-seven of the largest Cities of the United States, where public education prevails. We submit them to the careful perusal of our citizens, in order to show with what care the expenditure

of public money is made. The examination will display the parsimony exercised in relation to salaries of Teachers; Dubuque and Milwaukee being the only two cities of the United States which fall below Philadelphia in the amount paid per pupil for salaries.

In Philadelphia, the average cost per pupil for salaries is	\$9 40
In New York, " " " "	18 88
In Boston, " " " "	18 76
In New Orleans, " " " "	20 30
In San Francisco, " " " "	20 61
In Cincinnati, " " " "	16 74
In St. Louis, " " " "	16 66
In Pittsburg, " " " "	16 43
In Louisville, " " " "	15 68
In Springfield, Ill., " " " "	15 77
In Chicago, " " " "	14 76
In Buffalo, " " " "	14 76

It should here be remarked, that the average cost above is given for Philadelphia for the year 1867, and all the other cities for earlier periods of twelve months each; Chicago and St. Louis, five months earlier; San Francisco, Cincinnati, Louisville, and Springfield, six months earlier; Pittsburg, seven months; Boston, eight months; New York, one year; New Orleans, eighteen months; and Buffalo, two years earlier.

As salaries have been increased generally during this time, and as, in Philadelphia, an increase of 20 per cent. was made on the lower salaries, and 10 per cent. on the salaries of 113 Teachers of the higher grades, raising the average cost per pupil from \$8 22, in 1866, to \$9 40, in 1867, there is a greater difference than is shown above.

In Buffalo, in 1865, per the latest report received, the average cost per pupil for salaries of Teachers, was \$14 76; in Philadelphia, for the same time, \$8 26, or 56 per cent. of the Buffalo rate.

In New Orleans, \$20 30; in Philadelphia, for same time, \$8 24, nearly 40 per cent. of the New Orleans cost.

In New York, \$18 88; in Philadelphia, for same time, \$8 22, about 43½ per cent.

In Boston, \$18 76; in Philadelphia, for same time, eight months of 1866, and four months of 1867, \$8 61, about 46 per cent.

In Pittsburg, in our own State, \$16 43; in Philadelphia, as above, \$8 71, about 53 per cent.

In Springfield, \$15 77; in Philadelphia, \$8 81, 56 per cent.

In Louisville, \$15 68; in Philadelphia, \$8 81, 56 per cent.

In Cincinnati, \$16 74; in Philadelphia, \$8 81, 52½ per cent.

In San Francisco, \$20 61; in Philadelphia, \$8 81, 42½ per cent.

In St. Louis, \$16 66; in Philadelphia, \$8 91, 52½ per cent.

In Chicago, \$14 76; in Philadelphia, \$8 91, 60½ per cent.

In Baltimore, \$17 77; in Philadelphia, \$9 40, 52.9 per cent., and some expenses are not included in Baltimore.

It will thus be perceived that Philadelphia has paid her Public School Teachers, per pupil in actual attendance, but *about one-half* (40 to 60 per cent.) of what is paid in other Cities.

RELATIVE DUTIES AND RIGHTS OF CONTROLLERS AND COUNCILS.

There seems to be, in the public mind, an idea that the Councils of the City of Philadelphia have, in some form or shape, a supervisory control over the educational affairs of the City. This is a great and serious error, and the sooner it is made manifest to the public mind, and to Councils also, the better it will be for the interests of our Schools. The Board of School Controllers is not a Department of the City Government, as the Highway Department, for instance, is. It is not managed, or designed to be managed, by a Committee of Councils, as the Highway Department is. This Board by law makes no report to Councils, as does the Highway Department. Its members do not hold their appointments from Councils. The Councils of the City of Philadelphia are elected pursuant to the Act of Consolidation. The Controllers hold their appointments pur-

suant to a Supplement to the Act of Consolidation ; and, therefore, it is justly said that each holds appointment pursuant to the will of the people, as expressed through the Legislature.

Each has its own exclusive privileges, its own exclusive powers, its own exclusive jurisdiction, its own exclusive duties, and its own heavy and exclusive responsibilities. The Councils are not responsible to the School Board for their actions, nor is the School Board responsible to Councils. Councils and the School Board are alike responsible to the people. The Councils of the City of Philadelphia have no more right to instruct the Board of School Controllers in respect to educational affairs, than has the Board of School Controllers the right to instruct Councils in regard to details of municipal management. In all respects, save one, they are utterly and entirely independent of each other, and they should be so. This one exception is with reference to finances. The power of *levying* taxes has, since Consolidation, been given directly to the City Councils, and they are charged with the *duty of including in the levy, so much as will be requisite for the Public Schools*. The Constitution of Pennsylvania requires that the Legislature *shall* provide by law for the establishment of Schools *throughout* the State, in such manner that the poor may be taught gratis ; and the Supreme Court of Pennsylvania has held that Laws providing for the establishment throughout the Commonwealth, of Common Schools for the education of all between the ages of five and twenty-one, are within the meaning of the Constitution.

(5 Harris. S. C. Reports, 118.)

Pursuant, therefore, to the plain requirement of the Constitution, the Legislature of Pennsylvania, by the Act of Consolidation in 1854, provided for the establishment and management of the Public Schools of Philadelphia, and placed that management under the Controllers and Directors respectively, and not in the hands of City Councils. The Act of Consolidation made it the duty of City Councils to provide, by ordinance,

“for the establishment and regulation of all the Departments indicated by the Act—which were declared to be, viz: For Law, Police, Finance, Surveys, Highways, Health, Gas, Fire, Poor, the City proper, and the Public Grounds.” It will be observed that the Schools are omitted, and therefore are not subject to “Establishment and regulation” by ordinance of Councils. This law made it the duty of the Controllers of Schools annually to furnish the City Councils with an estimate of the amount that, in the judgment of the Controllers, would be required during the year for the support of the Public Schools; and the same law declared that “the City Councils *shall* fix the rate and levy,” etc., and “direct the amount to be paid by the City Treasurer to Health, *Schools*, Poor, City and other purposes.”

It has been well said by the Supreme Court in the case of Johnson's Appeal, 11 Wright, 384, “From an examination of the Acts of Assembly to which our attention has been directed in this case, it is apparent that everything pertaining to Public Schools, within the City and County of Philadelphia, has been committed to the Board of Controllers, excepting only the public purse, which has been kept carefully in the hands of the City Councils. The Controllers have power to establish schools, to provide school-books, make rules and regulations, to appoint teachers and *fix their salaries*, but have no right to raise or appropriate revenues. The Legislature of the City was not a body fitted to descend into the minute details of the system and to measure out the exact sum each teacher was to receive, but they could classify the general objects of the expenditure of which Teachers' salaries would be one, leaving to the Controllers the sub-divisions of the sum appropriated to that object, among the several individuals entitled to share it.”

Thus it will appear that it is the imperative duty of City Councils to levy a tax for School purposes, and it is not stretching the law to say that Councils are bound to levy an amount *sufficient to defray the expenses of the Schools*. And while they ought to exercise their judgment in the premises, they are

bound also to regard the estimates of the Board of Control. The question of *sufficiency* simply becomes a question of fact, which, in case of disagreement between the Municipal and School Authorities, may be settled perhaps by a Court of competent jurisdiction. The appropriation, once made, is unquestionably, solely, exclusively, and entirely under the power of the Controllers, and it cannot be, and ought not to be, disturbed or affected in any way by Municipal Legislation; else the machinery of the School System becomes impeded, clogged, and deranged, contrary to the true intent and meaning of the Constitution of the State, and of the Legislation in carrying out its provisions.

Among the powers conferred upon the Controllers are, "to determine upon the number of school-houses which shall be erected"; "to establish a Model School in order to qualify Teachers for the Sectional Schools, or for Schools in other parts of the State"; "to provide such suitable books as they may deem necessary"; "to make such rules and regulations for their own government, and for the general regulation of the District as they may deem necessary"; "to have general superintendence over all the Schools"; "to apportion school-houses"; "and to distribute the duties of the Directors of the Schools to and for any of the Wards of the City."

It is to be regretted that some of the powers thus conferred have been rendered abortive, by reason of a misconception of their powers by Councils. For instance, it is clearly within the province of the Controllers to declare what studies shall be introduced into the Schools of Philadelphia, and thereupon it becomes the *duty* of Councils to appropriate a sufficient amount for the purpose. It does not belong to Councils to say whether they will or will not sanction the introduction of a study, and to refuse to make any appropriation therefor; otherwise, the Councils themselves would be the Controllers, and the lawful Controllers would practically be the merest implements in the hands of Councils, and they would thus be shorn of all their rights, powers, and privileges.

Year after year, and for many years, have the Controllers, in the exercise of their legitimate power, decided to introduce the study of Vocal Music to a limited extent; and as often as they have asked for a small amount of money to defray the reasonable expenses thereof, so often have the Councils positively voted against any appropriation therefor. Now it is submitted, that this is an undue exercise of control over this co-ordinate branch of City Government, and such as cannot be sustained by any fair construction of the law. If the amount asked for had been deemed by the Councils *more than sufficient for the purpose*, then indeed there might be some extenuation for the refusal, but this has never been asserted; and thus it is, that Philadelphia alone, of all the large cities of the United States, is without a systematic course of elementary musical instruction in her Public Schools.

The same remarks may be applied to the subject of Physical Culture. With a very moderate expense, a thorough, simple, and effective system of physical exercises could be introduced into our schools, through the instrumentality of two or three well trained teachers, to instruct the Teachers of the schools of Philadelphia in the art, within a reasonable period, and they in turn could organize the system in each one of the schools of Philadelphia, and thus afford to our eighty thousand children the advantages of healthful exercises, more important even, we are free to say, than any portion of the mental culture. Over and over again has this Board asked for the means to engraft this desirable feature upon our system, and each time the appropriation has been peremptorily refused.

These are single instances of what may be called interference with the rights and powers of this Board, and, if continued, they must result in an application to the people, through its Legislature, for that power which pertains to every other Board of School Controllers in the Commonwealth, viz.: to levy its own tax, under proper restrictions and within defined limits. This Board ought not to be held responsible, in the

public mind, for the non-performance of duties, clearly ordained, but practically rendered nugatory by the act of *another co-ordinate branch* of City Government. The fearful amount of labor and responsibility thrown upon the Councils of the City of Philadelphia, must necessarily preclude that careful, cautious, watchful, and intelligent supervision of our schools, which their importance demands; and doubtless, for this reason, the Legislature has not conferred upon that body any such powers and privileges, and they should not be, directly or indirectly, exercised.

In the wisdom of our Controllers, under the express authority of the law, High Schools have been established. From time to time, money has been asked to defray the expenditures consequent thereupon. And yet every year we find attempts, unsuccessful thus far it is true, on the part of a respectable portion of Councilmen to strike out the High School feature from the system, by attempts to prevent all appropriations for it.

Again, we know that we have an efficient and zealous corps of Teachers, male and female; with them we are brought daily into contact. They are selected after years of preparatory study, and, as a whole, are not excelled by any corps of Teachers in the land. We know the amount of their duties, and we know much of the performance of them. We know the success of our schools under their charge, and *we* best know the value of their services. These things the Councils of Philadelphia never can know or appreciate as we do, until they become active Controllers themselves; and, therefore, we claim that we are better able to fix the value of their services, and that Councils should pay marked regard, to say the least, to the expression of the wishes of this Board on that behalf. The Legislature never designed to place any power in the hands of Councils, which could be exercised to the detriment or destruction of any part or parcel of our school system.

If the Councils have the right to say that a Teacher's salary shall be \$400 a year, then they have the right to say that it

shall be \$200, or that it shall be placed at such a sum that will drive away the best of our Teachers, by reason of its utter inadequacy ; this we unhesitatingly affirm has been done, over and over again. Quite a number of the ablest, most experienced, and most successful of our male Teachers have been driven from their positions by the refusal of City Councils to make the appropriations which the Board of Control asked for their salaries, and others are preparing to follow. It will not do to say, in reply, "there are plenty of Teachers who can be had at that, or a lower salary," for we claim the right to insist that the best and most experienced Teachers shall hold their places, and that we will not sanction the practice of dispossessing them in order to make room for those less experienced.

The decision in the case of Johnson's appeal, before referred to, holds that Councils have the right to fix the gross amount which the Controllers shall expend for Teachers' Salaries, and that the Controllers alone have the power of sub-division of the same.

If the expenses of the Public Schools of Philadelphia, were not less proportionally than those in any other large City of the United States, we would hesitate to speak upon this subject with so much emphasis ; the charge of wasteful extravagance cannot be made, and we believe has not been thought of.

The relative powers of Councils and the Board of Control should be the subject of careful examination between the present time and the meeting of the next Legislature ; and whatever legislative action may be asked for, will have in view the best interests of the public.

It may not be generally known what care, caution, and prudence, have been exercised in the past, with respect to the current annual expenses of the schools of this city. Few of the tax-payers have any appreciation of the checks and guards thrown out to avoid an undue demand for money. In order that the subject may be fully appreciated by the community,

it may be well, in brief, to explain the whole course of procedure, having in view the amount absolutely required for School purposes.

Several months before the expiration of each current year, a notification from Councils is received by the Board of Control, asking for an estimate of the current expenses of the following year. This includes the Salaries of Teachers, Rents of School Houses, Ground Rents, Books and Stationery for Pupils, Repairs and Additions to School Houses, Fuel, Furnaces and Stoves, Janitors' Wages, Furniture, Printing and Petty Expenses, Clerk Hire, and the General Expenses of the Board of Control. Upon receipt of this notice, the Board of Control asks from the several Boards of Directors of the Twenty-eight Sections or Wards, their respective estimates. Accompanying this request, there are furnished the printed forms of estimates, which each Sectional Board is required to fill up, and it is required, in doing so, to specify how much in their judgment is needed for each school for the purposes above set forth, in order that the Board of Control may have the opportunity of deciding upon the reasonableness and propriety of each item of expenditure.

The practice is for each of the Sectional Boards to refer these printed forms to the several Committees having charge of the respective Schools of the Ward. These Committees best know the requirements of their Schools, and therefore it is most fitting that they should be referred to them. In due time, these Committees report to each Sectional Board of School Directors, respectively, their estimates, so that the Board may have the opportunity of reducing or enlarging them, as in their judgment may be deemed wise. The Sectional Board finally, and after due consideration, presents the estimates, in a consolidated and detailed tabular form, to the Board of Control for their action thereupon. And this Board has all these estimates referred to a Special Committee composed of nine prudent and careful gentlemen, members of the Board. This Committee calls before it, the Controllers of the Section, and oftentimes some of the Ward

1

Directors, whenever they wish to be advised with respect to any of the estimated items, and in all cases where there is any reasonable question or doubt as to the propriety of any item, a Sub-Committee is appointed to examine and report to the Committee upon the same. If it be, for instance, a matter with respect to the Repairs of a School-house, the Sub-Committee visits it, and hears what the School Directors have to say with regard thereto, and after the examination, the Sub-Committee reports to the General Committee, and the recommendation is adopted or rejected, as may be deemed best. After full consideration of all the Estimates from the various Boards, the General Committee on Estimates makes its Report to the Board of Control. There may be a considerable amount of cutting down in the demands of the various Boards of School Directors, and sometimes the Estimates may be increased; when the Report is before the Board of Control, it is still liable to further depletion, and when finally agreed upon, it is forwarded to the City Councils, and then commences a system of further depletion.

First, it is referred to the Committee on Schools of Councils, and at its hands it receives close scrutiny and a careful overhauling; and almost invariably the amount asked for is reduced, and so reported to Councils. And here it might be just to the School interests of Philadelphia that the Estimates should rest, and that Councils should act upon the Report of that Committee. But another ordeal is in store for the Estimates. Councils, not content with the action of the Ward Committees, the Ward Directors, the Controllers' Committee, the Controllers themselves, and their own Committee upon Schools, have hitherto deemed it proper to refer the Estimates as reported by their Committee on Schools to the Committee on Finance. Now this Committee is a general Committee on the Finances and upon the Estimates for all municipal affairs, and it has a fearful amount of work on hand towards the expiration of the year, so great and so onerous, that it is submitted that its members cannot do justice to the detailed estimates thus furnished

them. These Estimates are again overhauled, however, again reduced, and so reported to Councils. It is a very fortunate thing indeed, if, in the midst of the immense pressure of business, which falls upon Councils and its Committees towards the end of the year, the Committee is able to make its Report at all within the year; its doing so is indeed of rare occurrence.

And still more fortunate is it, if, in case they do so, the Councils of the year should have time to pass the Appropriation Ordinance during the term of office of their own Finance and School Committees. Unfortunately, however, the estimates, by reason of the failure of the passage of the Appropriation Ordinance within the year, go over to the succeeding Councils, and there must take their fate, with perhaps a new Committee on Finance, and perhaps a new Committee on Schools, and they receive another overhauling, and finally an ordinance is reported to Councils. Each item is there taken up *seriatim*, and is liable to be stricken out, or cut down. After the action of one Branch, it then passes to the other, where similar privileges are allowed. Thus reduced, the Ordinance passes, not promptly at the beginning of the year, but frequently towards the end of February. Meanwhile, the School interests of Philadelphia are suffering for want of supplies, which cannot lawfully be ordered until Councils make an appropriation for the purpose. It is said by some: "Order your supplies, and enter into your contracts as the Departments of the Municipal Government do, the Ordinance *must* pass." We say in reply: "We will not violate the law, we will not order supplies, or make contracts for Books and Stationery, when the law forbids it without an appropriation." The result is, that the educational interests of Philadelphia actually suffer for the many and manifold delays in the passage of the Appropriation Ordinance, and we are powerless in the premises. During the past few months, in most of the schools of Philadelphia, the study of Penmanship was suspended, simply because there was no appropriation for the supply of Copy-books and Ink. The other studies of the schools were, in like manner,

interfered with, because there were no funds to justify us in a purchase of Books and Stationery. New divisions formed have been four months without a single book or slate, issued for them by the Board of Controllers.

The foregoing statement is not made in a spirit of fault-finding, but as a matter of justification. It is not designed to imply for an instant, that the Councils of Philadelphia, as bodies, are opposed to universal education, or that they purposely endeavor to impede this co-ordinate branch of City Government, because the community has reason to congratulate itself on many acts of liberality on the part of Councils towards public education. They have accorded to us one million of dollars for the erection of School-houses, and they yield us annually upwards of a million for the education of the children of their constituents, and in other ways they have evinced, from time to time, a just appreciation of public education. But we do submit, that there is not sufficient deference paid to the demands of this Board, that this Board is the best judge of the public need in respect to Educational affairs, and that the time is at hand, when some Legislative action is imperatively needed to enable this Board to carry out its measures without let or hindrance.

EDWARD SHIPPEN,

*President of the Board of Controllers of Public
Schools of the First School District of Pennsylvania.*

SUMMARY OF STATISTICS FOR 1867.

I. POPULATION.

Estimated Population of the City, 800 000
 Number of children between six and eighteen years of age,
 March 10th, 1867, per census made by policemen, under
 orders of the Mayor, at the request of the President of the
 Board of Controllers of Public Schools, 142 517
 Boys, 70 674; Girls, 71 843.

	Boys.	Girls.	Both Sexes.
Attending Public Schools :			
6 to 12 years of age, 30 576	28 701	59 277	
12 to 15 " " 7 167	7 124	14 291	
15 to 18 " " 1 413	1 438	2 851	
	<hr/>	<hr/>	
	39 156	37 263	76 419

Attending Private Schools :			
6 to 12 years of age, 3 936	4 365	8 301	
12 to 15 " " 1 317	1 560	2 877	
15 to 18 " " 685	936	1 621	
	<hr/>	<hr/>	
	5 938	6 861	12 799

Attending Parochial and Denominational Schools :			
6 to 12 years of age, 4 691	4 864	9 555	
12 to 15 " " 905	995	1 900	
15 to 18 " " 186	222	408	
	<hr/>	<hr/>	
	5 782	6 081	11 863

	Boys.	Girls.	Both Sexes.
Engaged in regular employment :			
6 to 12 years of age,	892	764	1 656
12 to 15 " "	4 125	3 130	7 255
15 to 18 " "	6 733	5 258	11 991
	<u>11 750</u>	<u>9 152</u>	<u>20 902</u>
Neither at school nor employment :			
6 to 12 years of age,	4 678	6 185	10 863
12 to 15 " "	1 834	2 707	4 541
15 to 18 " "	1 536	3 594	5 130
	<u>8 048</u>	<u>12 486</u>	<u>20 534</u>

Probably these numbers should be greater, as it was said that omissions were made.

Number of School Sections in First School District of Pennsylvania (City of Philadelphia), each ward forming a School Section,	28
Number of Controllers of Public Schools,	28
Number of Directors in School Sections,	36

II. PUBLIC SCHOOLS.

Whole number of Schools,	374
High Schools,	2
Boys', 1; Girls', 1.	
Grammar Schools,	60
Boys', 25; Girls', 25; Consolidated, 10.	
Secondary Schools,	69
Primary Schools,	187
Unclassified Schools,	56
Consolidated Schools are for Boys and Girls together.	
Average number of Pupils at end of year to each school,	215

III. PUPILS.

Number of Pupils at the beginning of the year,	78 813
Number of Pupils admitted during the year, (including those promoted from lower schools,)	55 386
Increase over 1866,	2 463

Whole number of Pupils registered during the year, (including promoted Pupils, each registered in two schools,) . . .	134 199
Increase over 1866,	4 973
Number of Pupils leaving school during the year, (including those promoted to higher schools,)	53 789
Increase over 1866,	2 140
Number of Pupils actually belonging to the Public Schools, Dec. 23, 1867, from certified lists of names and residences,	80 410
Boys, 40,738; Girls, 39,377.	
Increase over 1866—in 1 year,	3 246
“ “ 1862—in 5 years,	11 456
“ “ 1857—in 10 “	22 889
“ “ 1847—in 20 “	42 875
“ “ 1837—in 30 “	63 410
“ “ 1827—in 40 “	75 807
“ “ 1818—in 49 “	77 328
The number has doubled in 19 years.	
Number of Applicants waiting for admission,	4 019
Average daily attendance of Pupils in all the schools,	69 681
Increase over 1866,	3 348
Average number of Pupils belonging to the Public Schools in 1867 (estimated)	79 612
Average daily absence of Pupils in all the schools (estimated)	9 931
Percentage of average number belonging on the whole number of children between six and eighteen years of age,	55.86
Percentage of average number belonging on the whole number registered (including double registries)	59.40
Percentage of average attendance on average number belonging to the schools,	87.53
Percentage of average attendance on the whole number between six and eighteen years of age,	48.89
Percentage of average attendance on the whole number registered (including double registries)	51.92

IV. TEACHERS.

Whole number of Teachers at end of year,	1 367
Male Teachers, 61; Female Teachers, 1286.	
Increase for the year,	53
Males, 2; Females, 51.	
Average number of Pupils registered during the year for each Teacher,	100 ¹²² ₁₇₄₆
Average number of Pupils belonging at the end of the year for each Teacher,	58 ¹¹⁴ ₁₄₄
Average attendance of Pupils during the year for each Teacher,	52 ¹⁷¹ ₁₇₄₀

V. EXPENDITURES.

Amount of Salaries paid to Teachers in 1867,	\$656 159.50
Increase for the year,	\$10 606.73
Amount paid for Rent of School-houses,	43 594.24
Increase for the year,	1 107.79
Amount paid for Ground Rents,	27 767.77
Increase for the year,	8 593.81
Cost of Books and Stationery for Pupils,	79 999.92
Increase for the year,	5 000.00
Amount paid for Repairs and Additions to School-houses,	37 731.46
Increase for the year,	2 591.21
Cost of Fuel,	40 918.36
Decrease for the year,	564.17
Amount paid for Furnaces and Stoves,	35 981.07
Increase for the year, (principally for new School-houses,)	25 217.02
Wages paid to Housekeepers,	58 349.10
Increase for the year,	10 942.77
Cost of Furniture,	79 701.81
Increase for the year, (principally for new School-houses,)	58 131.15

Amount paid for Printing and Petty Expenses of High Schools and Sectional Boards, . . .	\$11 935.16
Increase for the year, . . . \$ 4 405.00	
Amount paid for Clerk Hire for Sectional Boards, . . .	2 750.00
Increase for the year, . . . 100.01	
Amount of General Expenses, . . .	18 081.78
Increase for the year, . . . 2 562.59	
Cost of new School-houses, (from Loan,) , . .	399 949.39
Cost of Lots of Ground,	8 700.00
Whole amount appropriated by the City Councils for the support of the Public Schools for the year 1867, . .	1 136 464.42
Whole amount of Expenditures for all purposes by Controllers of Public Schools, from State and City appropriations,	1 092 970.17
Unexpended balance of City appropriation, merged in general fund,	43 494.25
Share of the City of Philadelphia in the State appropriation of 1867 for the support of Common Schools, not paid to the Controllers, but placed in the City Treasury, and used for other purposes,	62 637.78
Total amount devoted to the School purposes of the City, remaining unexpended,	1061 32.03

VI. COST PER PUPIL.

For Tuition only, (Salaries of Teachers,) per annum :	
On average number of Pupils belonging,	\$8.23
Increase for the year, \$0.90	
On average attendance,	9.40
Increase for the year, 1.18	
On whole number registered,	4.89
Increase for the year, 0.67	

For Books and Stationery, per annum :

On average number belonging,	\$ 1.00
Decrease for the year, \$0.00½	
On average attendance,	1.15
Increase for the year, 0.02	
On whole number registered,	0.59
Increase for the year, 0.01	

For Total Expenses of all kinds, per annum :

On average number belonging,	13.73
Increase for the year, 1.94	
On average attendance,	15.66
Increase for the year, 2.43	
On whole number registered,	8.14
Increase for the year, 1.35	

Total cost for each Pupil per month :

On average number belonging,	1.14
On average attendance,	1.30½
On whole number registered,	0.68

ison of the Budget for 1868 of the Board of Education of York City, adopted by them Feb. 5, 1868, with the Estimates 868 of the Controllers of Public Schools of Philadelphia, ted to City Councils Nov. 27, 1867. Passed March 4,

Attendance of Pupils in 1867:	Amounts appropriated in New York.	Proportional sums for Philadelphia.	Estimates of Controllers in Philadelphia.	Per cent. of proportional sums.	Difference saved in Philadelphia.

er.....	2 514	1 367

Philadelphia Estimates are less than half of what would be proportional, if the average attendance in New York is given correctly; but it has been asserted that the whole number of pupils is not over 90 000.

BALTIMORE ESTIMATES FOR 1868.

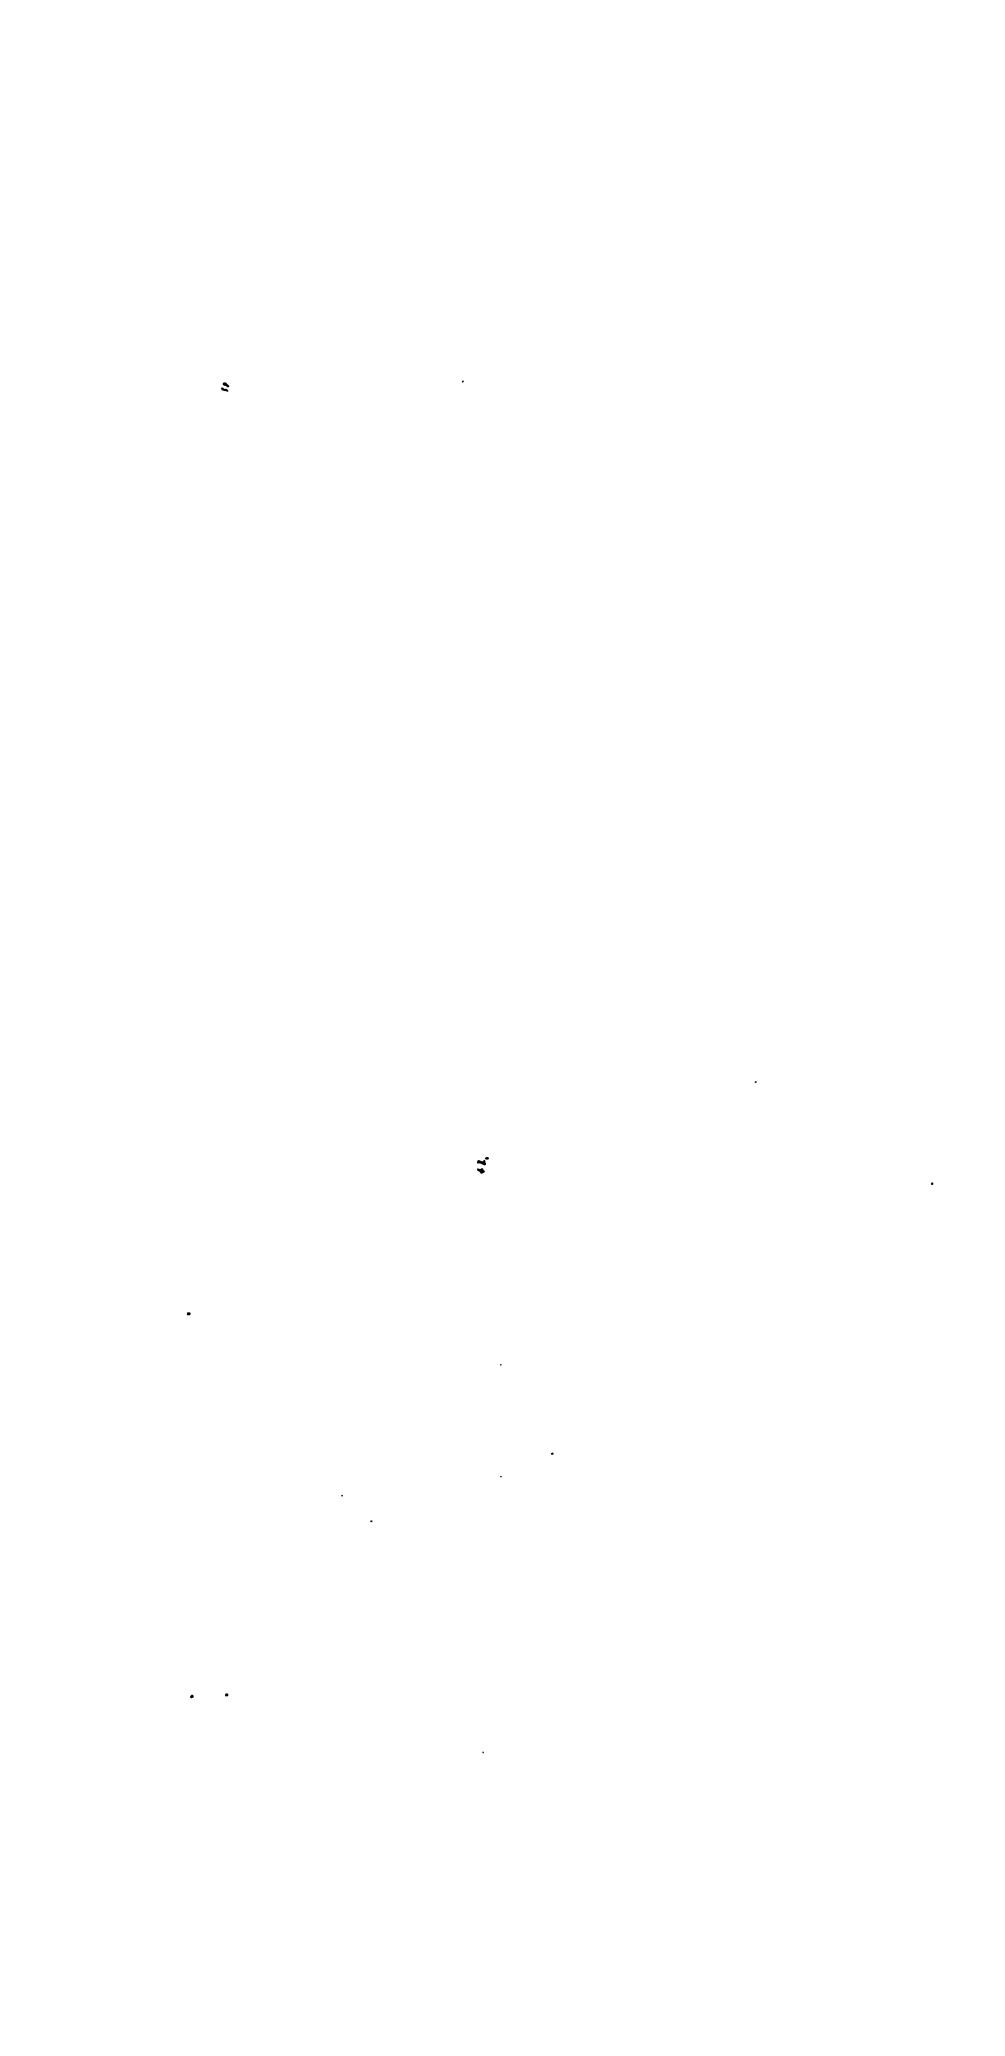

In Baltimore, the estimates of the Commissioners of Schools of the amounts required for the year 1868, were as follows :

For whole expenses of Schools for White Pupils,	.	\$463 000.00
For Colored Schools,	.	55 000.00
		<hr/>
		\$518 000.00
For new buildings recommended,	.	82 500.00
		<hr/>
Total,	.	\$600 500.00

for an average attendance, white and colored, of 19 882 pupils.

Philadelphia, with an average attendance of 69 781 pupils, should have, in proportion with Baltimore, exclusive of new buildings, \$1 818 054.42 The Philadelphia estimates (not the amount appropriated), were 1 111 083.00 being a little over 61 per cent. of Baltimore rate.

Including new buildings, to be paid for from taxes levied, Philadelphia should have, to equal Baltimore, \$2 107 609.42, but the estimates were for but about 52½ per cent. of this amount ; that is, \$996 526.42 less.

A. Details of the Cost of Education of Pupils in the Public Schools of Philadelphia, for the year 1867.

Computed from the Average Daily Attendance during the year.

REPORT
OF THE
Principal of the Central High School
For the year ending December, 1867.

TO MESSRS. JAS. FREEBORN, CHAS. M. LUKENS, STEPHEN H. SMITH, AND
CHAS. HARMAR, *Committee on Central High School.*

GENTLEMEN:—

I have the honor to submit the Annual Report of the Central High School for the year 1867, comprising the fifty-eighth and fifty-ninth terms.

At the beginning of the year the necessity was recognized for a partial re-arrangement of the course of study.

The work had been commenced in 1866, by the establishment of the department of "Commercial Calculations and Business Forms," referred to in the last report. It was now diligently prosecuted to completion, and at the opening of the fifty-eighth term, in February, 1867, the new roster was ready for distribution among the pupils.

The first change effected was the abolition of the study of the French language, and the substitution in its place of the department of "Physical Geography and Civil Engineering."

This was done in obedience to the demand for a more practical education. It had long been felt that a disproportionate share of attention was devoted to the study of languages. The number taught had been reduced, some years previously, by the omission of the Greek, and the present was deemed a good opportunity to omit one of the modern tongues still on the list, either the French or the German. To decide which should be

retained was a question of some nicety, and it accordingly received much earnest consideration. The value and beauty of the French, and the rich and varied literature which it embodies were fully appreciated, but in weighing its merits relatively to the German, the decision was finally in favor of the latter. It was considered that the German was of the greater *practical* value as a qualification for business, in view of the large and growing German element of our population. On farther reflection it was also remembered that, the English, being originally one of the Germanic group of languages, the study of the German could not fail to shed a light upon the material, structure and development of our native tongue scarcely to be over-estimated. True, the close historic connection of the French with the English had not been without its permanent and deep impression on the latter. That impression had consisted, chiefly, however, in the transmission of the Latin or Romanic element of our speech, and this was already illustrated, sufficiently for the purposes of the general student, in the study of the Latin language still retained in the curriculum, and which will, I trust, ever continue to be cherished as an essential part of the course.

All doubt was thus effectually removed, and the abolition of the French was recommended, to make room for the new department contemplated, which had suggested itself as more in accordance with the tendencies and wants of the day. Although comprehending two distinct subjects, intended for distinct stages of the course, the main object proposed was the introduction, for the benefit of the younger classes, of Physical Geography. As a branch of Natural Science adapted to stimulate and to train the faculties naturally active in the mind of youth, and as the necessary continuation and complement of a study only commenced in the Grammar Schools, its appropriateness could not be overlooked. Practically useful as a knowledge of its elementary facts and principles, must prove in all the varied relations of business and of social life, the process of its acquisition could not but discipline and prepare the mind, as perhaps no other study could, for the investigation of nature in all the infinite variety of her manifestations. Correcting the erroneous and limited notions of the scope and purpose of Geographical science acquired from the methods of teaching it in vogue, it was calculated, at the same time, to connect advantageously with the kindred branches of Natural Science and with the subject of History already taught in the institution, and both

to give and to receive in mutual exchange with those departments important and indispensable illustration. The advantages and excellencies of the study were amply sufficient to justify its introduction, and indeed, to excite surprise at its omission heretofore. Dealing with the leading and more obvious phenomena of nature, not resting in such phenomena, but searching out the underlying principles that control their operation, explaining the natural relations of *man* and the external world by which he is surrounded and to which he is so marvelously adapted, it teaches how nature operates to promote, or to retard the civilization of humanity and how the artificial divisions of our political geography are made, in subordination to those divisions which nature has, herself, marked out upon the globe.

Above all, it confirms the teachings of our religions, as it shows how, by a close study and careful observance of phenomena and laws, man can render nature subservient to the purposes of his noblest ambitions and loftiest culture. No subject could possibly be more alluring to the student or more fruitful of rich results in return for his labor. Leading directly to the subjects of Mineralogy and Geology, it can not but awaken a taste for those important sciences and call for instruction in their leading facts and principles. Of certain use to all, with many it would stimulate to a love of nature and of natural science which could not fail to produce the happiest results. Such are, in brief, the considerations which induced the selection of this branch of study, and such a glorious outlook will justify, I trust, the enthusiasm which has led me to depart somewhat from the tone of moderation appropriate to a report like the present.

As to Civil Engineering, it was *not* strictly a *new* study, having been for years upon the list but not having been *taught* owing to the pressure and importance of the other studies with which it had been associated. Its revival was suggested, as an experiment due to its importance and popularity. It was not for an instant supposed that a school like this could provide the special training of an Engineer. It is, in fact, not within the scope of the institution to attempt such a thing. It was hoped, however, that in combination with the excellent courses of Physics and Chemistry, of Mathematics and Mechanical Drawing already in successful operation, a course of three lessons a week in this branch, during the *last* year, might lay a foundation for such special training that would facilitate its acquisition afterwards, at a reduced outlay of both time and

money. What result may be accomplished, it is yet too soon to predict. At the earliest practicable moment I will lay before you my deliberate judgment with regard to it.

The new department was approved most cordially by the Committee on the School, and by them proposed to the Board of Controllers, who established it by resolution adopted on the 12th day of February, 1867.

Mr. Edwin J. Houston, a *graduate* of the *school*, who had been a close student and constantly engaged in teaching, since his graduation, was appointed, by the Committee, on trial, and after the lapse of about two months, his capacity having been satisfactorily established, he was, on the 14th day of May, 1867, elected by the Controllers to fill the new chair. He has since labored faithfully and with marked success, and is daily vindicating the anticipated usefulness of the department.

At the risk of some obscurity, a slight sketch will now be attempted of *all* the changes made in the course of study. To facilitate the understanding of it, a detailed statement of both the old and the new courses is here introduced in tabular form, in order that any, who are so disposed, may compare the two, item for item.

A careful examination of the new course will also show the nature and proportion of the studies assigned to *each class*, a right understanding of which is important.

The classes are known by the letters of the alphabet from "H," which represents the *lowest*, to "A," which represents the *highest* in the school.

FORMER COURSE OF STUDY IN THE CENTRAL HIGH SCHOOL.

A	Logic; Composition; Elocution.	Astronomy.	Latin.	Mechanical Drawing.	Mental Philosophy.	French.	Physics; Chemistry.	Anatomy; Physiology.
B	Logic; Composition; Elocution.	Integral Calculus.	Latin.	Mechanical Drawing.	Mental Philosophy.	French.	Physics; Chemistry.	Anatomy; Physiology.
C	Rhetoric; Composition; Elocution.	Differential Calculus.	Latin.	Perspective Drawing.	Political Economy.	French.	Physics; Chemistry.	Anatomy; Physiology.
D	Rhetoric; Composition; Elocution.	Analytical Geometry.	Latin.	Perspective Drawing.	Political Economy.	French.	Physics; Chemistry.	Anatomy; Physiology.
E	Rhetoric; Composition; Elocution.	Trigonometry.	Latin.	Drawing from Cards; Writing.	Moral Philosophy.	French.	Physics. Chemistry.	Natural History.
F	Rhetoric; Composition; Elocution.	Algebra; Surveying.	Latin.	Writing.	Moral Philosophy.	German.	Physics.	Natural History.
G		Algebra; Geometry.	Latin.	Writing.	History.	German.	Book-keeping.	
H		Algebra; Geometry.	Latin.	Writing.	History.	German.	Book-keeping.	

PRESENT COURSE OF STUDY IN THE CENTRAL HIGH SCHOOL.								
A	Logic; Composition; Elocution.	Astronomy.	Latin.	Mental Science.	Civil Engineering.	Physics; Chemistry.	Anatomy; Physiology.	Mechanical and Engineering Drawing.
B	Logic; Composition; Elocution.	Trigonometry; Integral Calculus.	Latin.	Mental Science.	Civil Engineering.	Physics; Chemistry.	Anatomy; Physiology.	Mechanical and Engineering Drawing.
C	Rhetoric; Composition; Elocution.	Differential Calculus.	Latin.	Moral Science.		Physics; Chemistry.	Anatomy; Physiology.	Shades and Shadows.
D	Composition; Elocution.	Analytical Geometry; Surveying.	Latin.	Moral Science.	German.	Physics; Chemistry.	Anatomy; Physiology.	Orthographic Projection.
E	Composition; Elocution.	Trigonometry; Geometry.	Latin.	Political Economy; History.	German.	Physics; Chemistry.	Book-keeping.	Linear Perspective.
F	Composition; Elocution.	Algebra; Geometry.	Latin.	Political Economy.	German.	Physics; Physical Geog.	Book-keeping.	Linear Perspective.
G	Composition.	Algebra; Geometry.	Com. Calculations and Forms; Penmanship.	History.	German.	Nat. History; Physical Geog.	Book-keeping.	Drawing from Cards.
H	Composition.	Algebra.	Com. Calculations and Forms; Penmanship.	History.	German.	Nat. History; Physical Geog.	Photography.	Drawing from Cards.

An investigation of the foregoing tables will show the changes to be as follows:

The Latin, being no longer taught during the *first* year, in its place will be found the subjects of Commercial Calculations and Business Forms and Penmanship. The study of Book-keeping, which had been limited to the *first* year, is now extended through the first *two* years, and Phonography substituted for Penmanship, which, as already stated, is transferred to another department. Geometry, which was formerly commenced in the lowest class and continued through only one year, is now postponed to the *second term*, and extended through eighteen months, the study of surveying connected with it being transferred from the first term of the *second* to the first term of the *third* year. Natural History being well suited to the younger scholars, has been removed from the second to the *first* year. The French language, which was taught during the last two and a half years, has been replaced, as already explained, by Civil Engineering during the last year, and Physical Geography during the first year and a half. The teaching of drawing from copies has been gradually lessened in amount, until it is confined now to the first year only, and during the remaining *three* years instruction is given in accordance with the admirable and progressively developed course of Perspective and Mechanical Drawing, arranged by Prof. Kern, and carried out to a degree of efficiency, hitherto, it is believed, unequalled in the history of the school. Tuition in the Belles Lettres, including practical instruction in the indispensable arts of Composition and Elocution, is now commenced in the lowest class, instead of being deferred until the *second year*. The study of History, formerly restricted to the first year, is extended by a course of lectures on historical subjects during the last term of the second year. German, formerly abandoned at the close of eighteen months, is now carried through the *first term* of the *third year*. The elements of Political Economy, so essential to the business education of young men, which, before, were not studied until the third, are now commenced in the second year of the course.

Such is, in brief, the summary of the changes effected. The aim has been invariably, to promote the thoroughness and the practical tendency of the education provided. It has been constantly sought to select for the lower classes, such studies as looked either to a preparation for business or were calculated to stimulate the perceptive faculties and develop the powers

of inductive reasoning. On the other hand, the studies which have been carried forward to a later stage of the course, are those which demanded more time than had been before given to them, or which needed for their acquirement the comparatively matured minds of the older pupils. Wherever practicable, the teaching is carried on by means of *lectures* and *oral explanations* in the *class-rooms*, and is illustrated by experiments, diagrams and the exhibition of specimens. With this end in view, the stock of apparatus and specimens, already valuable, is being yearly increased. It is not pretended that the work is finished. Several additional changes are *already* in contemplation, which look to the reduction of the number of studies, in order that some, more important and elementary in their nature, may be beneficially extended.

It is desired that more time should be devoted to the branches of Geometry, Physics and Chemistry, and if the end can be attained by the sacrifice of one or two studies, in which the applications of science are attempted to be taught, that sacrifice may be recommended. It is believed that the true way to make the course of instruction *practical*, is rather to prepare the way for such applications by thorough elementary instruction, than to attempt to teach what can be better learned in connection with special courses of training for particular trades or professions. This will be a matter for earnest deliberation during the ensuing year. It is also felt that a chair of *English Literature* would be a valuable addition to the school, but as that would require an addition to the corps of Professors and an increase of the appropriation, it can hardly be hoped for, at this time. I feel it my duty, nevertheless, to record my conviction, that the establishment of such a department would not only supply a class of information which the educated youth of our city ought to possess in no stinted measure, but would add a refining and elevating influence, calculated to promote the harmonious development of character which a liberal education ought to ensure. It is claimed with pride, however, that much has been accomplished, and that the greater devotion to study, the improved discipline and the growing tendency, on the part of the pupils, to remain in the school, are due in no small measure to the improved character and distribution of the studies.

Before leaving this subject, attention is asked, especially, to the fact that the studies *group* themselves naturally into courses, and that a curriculum is thus presented, whose seemingly diver-

sified departments are so co-ordinated into system and compacted into logical connection and sequence, that they mutually illustrate and simplify each other, promote the orderly development of the mind, and lighten the strain and burden of the student. These courses are obviously *three*, and are all equally necessary to a general education.

First. The branches of Penmanship, Phonography, Commercial Calculations and Forms, Political Economy, Physical Geography and the German language, unite to constitute a thorough practical business course, which extending through the first two years, and, in one instance, into the third year, furnishes an admirable preparation for a mercantile life.

Second. The Mathematical and Natural Science departments co-operate throughout the *four* years, to prepare the way for the higher walks of manufacturing and mechanical labor. The departments of Algebra, Geometry, Surveying and Engineering, the Higher Mathematics and Astronomy, Physical Geography, Natural History and Physiology, Physics and Chemistry and Mechanical Drawing, lay the indispensable groundwork for future training, and offer sterling opportunities to the youth of the city.

Third. The departments of English, Latin, German, History and Moral and Mental Science, unite in preparing the student for professional and literary study.

It is time that the *practical* character of the work, accomplished by the High School, should be realized, and the fact duly weighed, that *daily* some *five hundred* students are availing themselves of its advantages.

The revised rules for the government of the School, will be found in the appendix. It will be noticed, that the rule dropping from the roll any student obtaining a term average less than *fifty*, which before applied only to Class "H," is now extended to the entire school. The promoting averages have been changed in some particulars, and the rules, with regard to suspension, have been made more strict.

It may be proper here, also to refer to several matters in connection with the discipline of the school, not contained in the printed rules.

For more than a year, the old system of combining *scholarship* and *conduct*, in what was called a *grade* average, for the purpose of fixing the student's position in class, has been abandoned, it being believed that the two subjects of scholarship and conduct, are by their nature so dissimilar, that their at-

tempted union confused the impressions of the students, produced a sense of injustice and unnecessary irritation, and tended to deceive and mislead the *parents* as to the progress of their sons. If a student be proficient in scholarship, he is entitled to a clear and unmixed statement of that fact, and to the benefits accruing from it. If his moral character be defective, he is none the less entitled to the credit earned by his application to study. Without obscuring his real merits or depriving him of their fitting reward, his moral delinquencies can yet be exposed and punished in other ways with undiminished severity and with much more appropriateness and effect.

Several regulations have also been adopted and acted on by the Principal. Whenever during any school month, a student receives an average below *fifty* with *three* or more Professors, he is at once reported to his parents for neglect of study, and should the dereliction be repeated, an interview with the parent is required. Again, when a student has received a number of demerit marks for misconduct, which, though not sufficient to suspend him under the rules, is yet, in the opinion of the Principal, excessive, the parent is advised of it. Although at the cost of increased labor on the part of the Principal, this constant recourse to the parents is found to exercise a most salutary influence. It often checks a student who is insensible to other appeals, forces him to reflect, saves him from severer punishments, and makes a lasting impression on his moral character. Moreover, it keeps the parents clearly informed as to the progress their sons are making and conduces to a thorough understanding and sympathy between the parents and the authorities of the institution, than which nothing more tends to advance the best interests of the school. One additional rule was adopted by the High School Committee, but too late for publication, with the others. It provides that any student who may be suspended twice during a term shall be *dismissed* from the school. The severity of the penalty combined with the established certainty of its infliction, really lessens the aggregate of punishment.

The students are daily brought into closer relations of friendship with the Professors, and governed more and more through the gentle instrumentalities of kindness. Everything is done to cultivate their self-respect and sense of honor, and the success already achieved, is such as to justify the most hopeful anticipations. Anything like serious and deliberate disorder is unthought of, and every term is marked by fewer, of even the comparatively trifling breaches of discipline, which arise from negligence and inattention rather than from a purpose to do

wrong. There is every evidence that the students are contented both with the rules and with their administration, and an increased and increasing attention to study is evinced on all sides.

Of the co-operation of the Faculty in everything calculated to promote the good of the institution, it gives me pleasure to speak in the highest terms. They have, one and all, during the past year, been assiduous in the discharge of their duties, and have sustained me upon all occasions with a heartiness and vigor that have been highly gratifying. I here extend to them my sincere thanks and record my conviction, that so long as they continue their work with the zeal and concert of action thus far exhibited, the confidence of the public in the school, cannot fail to be both merited and enjoyed.

To the members of the Committee, during the year 1867, I also express my acknowledgments for their ready assumption of the responsibilities devolved upon them, and the manly support which they gave me in the discharge of my onerous and often delicate duties.

In the month of September, 1867, Prof. Henry Hartshorne, who had for several years occupied the chair of "Anatomy, Physiology and Natural History" with eminent ability, was invited to assume the charge of a department in Haverford College, an institution with which he had, in various ways, been long associated, and in which he felt a deep interest. Regarding the call in the light of a duty, he was compelled to tender his resignation to the High School Committee, and on the first of October, 1867, he vacated the chair. Esteeming his character and valuing his attainments, I parted from him reluctantly, and he carries with him into his new position, my best wishes for his continued prosperity and usefulness. The selection of a successor was a source of deep anxiety, but after a very short interregnum, the Committee appointed on trial, J. F. Holt, M. D., a graduate of Harvard University. His success has been, so far, all that could be desired, and I have every confidence that he will sustain the reputation of the chair which has always been deservedly high. On the tenth day of December, 1867, he was elected by the Board of Controllers to fill the vacancy.

The usual account of the admissions and commencements of the school will be found appropriately set forth in the appendices. In connection with the Commencements, it will be observed, that in July last, in place of the introductory address, so long customary, was substituted one, by a member of the

class of graduates of five years standing, receiving the degree of Master of Arts. Joseph Mason, Esq., who took the first honor of the class of July, 1862, was selected by his classmates to inaugurate a custom, which I trust, may be frequently observed in the future.

During the year, the room in the basement, long used for recitations, was abandoned, and the south-west room on the second story, formerly employed exclusively as a cabinet, was converted into a class-room. The substitution of a room of unsurpassed cheerfulness and convenience, for a damp, dark, unhealthy basement, though attended with some cost, was a gain not to be disregarded, relieving the students from the depressing and injurious influences which actually retarded the progress of their studies.

It is desirable that the school should be provided with a dissected manikin, and with models of the vocal apparatus, of the eye, and of some of the internal organs, for the department of "Anatomy and Physiology." The attention of the Controllers should also be called to the fact, that the cabinet and diagrams now in use in that department, and indispensable to its efficiency, are the property of the heirs of the late Prof. Henry McMurtrie, and that should they be removed from the school by their owners, they would be a very serious loss. They can be purchased, it is believed, for a sum, the interest on which would be less in amount than the annual rent now paid by the City.

In the month of February, 1867, Prof. Alexander Dallas Bache, the first Principal of the Central High School, died at Newport, R. I. His body was brought to Philadelphia, on its way to Washington for interment and was exposed to view, for a day, in the Hall of the American Philosophical Society. Having been appointed one of the Committee to make the requisite arrangements for its reception, I co-operated with that Committee while the body remained in the City. On the morning of the day fixed, February 21st, 1867, the flag of the school being displayed at half-mast, I briefly addressed the students, announcing the death of Prof. Bache, his connection with the school, his exalted character, and the nature of his services, both to the school and to the general cause of education. At the close of my remarks, I dismissed the students for the day, and called a meeting of the Faculty. The Professors at once assembled in the Principal's room, and upon motion of Prof. Isaac Norris, adopted the following resolutions :

WHEREAS, The Faculty of the Central High School have heard with profound regret of the death of Alexander Dallas Bache, the first Principal of this school, and for many years the able Superintendent of the United States Coast Survey; therefore

Resolved, That in Professor Bache's death the school has lost one who was ever its friend during life, was mainly instrumental in the great work of organizing it and contributed to the wide spread usefulness and influence it has always enjoyed.

Resolved, That Science has lost one of her brightest ornaments and most earnest votaries, of whom the world and our country especially, have reason to be proud.

Resolved, That Professor Bache's life, like that of his great ancestor, Franklin, was one eminently calculated to serve as a model for the young men of this school, and it should be their aim to copy his virtues and Christian character, and strive to equal his attainments.

Resolved, That steps be taken to secure, if possible, a portrait of the deceased for the lecture room of this school.

Resolved, That the Faculty tender to the widow and family of Professor Bache, their heartfelt sympathy in this, their great affliction, and as a mark of respect, will attend in a body such ceremonies as may take place in this city.

Resolved, That a copy of these resolutions be sent to the widow of the deceased, and be published in the papers of the day.

The Faculty immediately afterwards adjourned to proceed in a body to pay their last tribute of respect to the remains of the deceased. On the following day, with the Committee of Arrangements and other citizens, I accompanied the funeral cortege to the Baltimore depot.

The services of this illustrious man to the country and to science, need no comment here, but a word must be spoken as to his important relation to the High School. Prof. Bache had much to do with the organization of the school upon its present basis. Many of his arrangements subsist to this day. He thoroughly believed in the objects for which the school was established, and in its entire efficiency for the accomplishment of those objects. To the last, in his office of Superintendent of the United States Coast Survey, he appointed its students to positions under him, and in every way promoted their interests. He was ardently loved by those who were pupils during his

administration. By *all* who have been pupils, then and since, his memory will be cherished and revered. His name and reputation lend lustre to the institution, and under his able guidance, was commenced that career of usefulness, which, it is hoped, will always be continued with undiminished vigor. I earnestly trust that the debt of gratitude, which the school owes to him, may never be forgotten, and that his example, both as a man of science and a Christian gentleman, may always be regarded as the fitting model for the imitation of its students and its graduates.

The school was visited during the year by several people of note. Baron Mackay, of Holland, came unfortunately after school hours, and could learn the nature and working of the institution only from the explanations by the Principal. His intelligent inquiries and observations make it matter of regret, that he had no leisure for a second visit. Lord and Lady Amberley were more fortunate, as they arrived in time to see the classes at work. Committees of the School Commissioners and City Councils of Baltimore, Maryland, and of Columbus, Ohio, also made short visits, which will ever be pleasantly remembered.

The main event of this kind was, however, the visit of a Committee of Philadelphians, headed by the Mayor of the City, though unofficial in its character. In spite of a severe snow storm, these gentlemen came to the school and spent several hours in passing from room to room, and witnessing the ordinary exercises of the day. No deviation was made from the regular course of study, and the Professors continued their oral instructions as if no one were present. The visitors expressed themselves much gratified, and when they had seen all they desired, the students were assembled in the lecture room, where a few declamations were delivered, and they were addressed by the Rev. Henry J. Morton, Gustavus Remak, Esq., Mr. Thomas Potter, Chairman of the Committee on Finance of Councils, and His Honor the Mayor, after which the school was dismissed.

Such a visit, so conducted, is calculated to do much good, and I earnestly desire that there may be more like it in the future. Only in this way can the members of the community inform themselves as to the character of the institution and of the work which it is doing. If gentlemen, who are in the habit of publicly expressing their doubts as to its usefulness, would spend a few hours or even days, if they could spare them, in quietly scrutinizing the operations of the school, their doubts would beset at rest and their silence, if not their advocacy, secured.

It is a significant fact, that those who profess themselves unfriendly to the school are almost invariably those who know the *least* about its organization and its workings, and who persistently neglect to avail themselves of the frequent opportunities presented for acquiring information. They say the High School education is not practical in its tendencies, without being able to state what constitutes its course of study. They assert that its graduates are unfit for the ordinary work of business life, in the very face of the facts, that I am constantly in receipt of more applications for their services than I can supply, that eight of the Professors of the School and at least half of the Principals of Grammar Schools are among its graduates and that numbers of its former pupils were prominent in the war, are to-day conspicuous in every department of labor, and have, in many instances, attained positions of very considerable eminence. They say, finally, that the High School is not an essential or important part of the Public School system, because it benefits but a small portion of the pupils that attend the Public Schools. This last statement evinces so profound an ignorance of both the facts and of the legitimate scope and limits of the higher education, that I must ask permission to submit, in concluding my report, a few observations which, I trust, will not be misunderstood.

If it were true that the school failed to accommodate the pupils *qualified for admission*, it would indeed be an argument for its extension, or for the establishment of another school of similar grade, but scarcely for its abolition and for the denial to *all* of that liberal education for which, by the very argument itself, so many are admitted to have a capacity and a claim. The fact, however, is otherwise. Whatever, hereafter may be the case, the High School has, in the past, accommodated *all* who were *qualified* for admission. That these, though a large number, constituted a minority of the Public School pupils is true, but it should be remembered, that the higher education is, from its nature, adapted only to those who are gifted with more than the average capacity for learning, and that such are a *minority* at all times, and in all places. But whether they be few or many, their education is of equal importance to the community, because, through them, its benefits extend and ramify themselves through all classes of society. Like the leaven, which, though small in amount, spreads through the mass, and gives it its characteristic quality and value, the higher education, though but a few may be capable of directly receiving and improving it, indirectly, through these

influences, guides, informs and elevates *all*. Important as the development of the *average* mind may be, it cannot be doubted by those who observe and know the history of civilization, that much of the progress and welfare of humanity depends upon the proper development of those minds, which are designed by the Creator to *lead* in the affairs of life, and which, though few in proportion, far outweigh the many in their influence, and, in fact, give to the world most of its opinions and principles of action. To develop such minds in the function of the higher education, and it is to bear its share in that important work that the High School was established and is maintained. Such minds are not confined to any class, but are scattered indiscriminately among the high and low, the rich and poor. It is all important, therefore, that though cradled in obscurity and poverty, they should not be deprived of the educational training, without which, they would be shorn of their strength, or abnormally developed into an activity for *evil*, rather than for good. There can be no privilege more sacred to the *many* than that those among them, who are blessed by the Creator with capacities for a wider sphere of usefulness than that to which the accidents of birth or circumstance may have assigned them, should have an opportunity for the development and exercise of such faculties, and that the *leaders* of thought in the future, shall not be drawn only from the upper strata of society, but being taken, as well, from the obscure places of the world, shall be bound by the ties of their origin, by their associations, by their natural sympathies, and above all, by their sense of obligation, to the great masses of humanity to whom they belong and to whom they will be thus indebted for their elevation. As the family recognizes that its advancement is involved in the success of those of its members to whom nature has been lavish of her gifts, so the community, which is the family on a larger scale, should realize that the general progress of its civilization depends largely upon the degree of culture given to those whose capacity demands and justifies the higher education.

Respectfully submitted,

G. I. RICÉ,
Principal.

APPENDICES.

RULES

FOR THE

GOVERNMENT OF THE CENTRAL HIGH SCHOOL.

1. For any act of a pupil which hinders the progress of study, and which might be avoided by due attention, he may be marked any number of misconduct marks not exceeding five in one hour.

2. If a Professor consider a pupil deserving of more than five misconduct marks in one hour, he may report the case directly to the Principal, or may notify the pupil to answer therefor, (under a penalty of 30 misconduct marks if he fail to appear,) at the next stated meeting of the Faculty, previous to which the Professor shall report the case in writing to the Principal.

3. Any pupil whose misconduct marks amount to 50 in two consecutive months of a term, or to 25 during the last month of a term, shall be suspended; also, any pupil committing an offence, which in the opinion of the Principal requires suspension.

4. Suspensions shall continue until the next meeting of the High School Committee, to which they shall be reported,

except that the Principal may, when a pupil is first suspended during a term, after an interview with one of his parents or his guardian, re-admit him on trial one week after his suspension. The Principal or the Faculty may, at any stage in the process of discipline, recommend the expulsion of a pupil.

5. Pupils under suspension may be permitted, by special resolution of the Faculty, to attend examinations for promotion.

6. The misconduct marks of a pupil, with the offences for which they are given, shall be announced to him weekly or oftener, as the Principal may deem expedient.

7. A monthly scholarship average, on the scale of 100, shall be computed for each pupil. The average of the monthly results shall be added to the examination average, and half their sum shall constitute his term average.

8. No pupil shall be advanced with his class at the end of a term, who shall have a term average less than 50 with three Professors, or a general term average less than 55 for G and H, 60 for E and F, 65 for C and D, and 70 for B; and no pupil shall receive the degree of Bachelor of Arts, who shall have a term average less than 60, with three Professors, or a general term average less than 75 for the last term.

9. A pupil failing to obtain a term average of 50, or failing twice in succession to obtain the promoting average, shall be dropped from the list of pupils, unless his failure shall have been occasioned by sickness or other cause over which he had no control.

10. To be entitled to a certificate, a pupil must have remained in the school for at least two years, and must obtain a promoting average for the term preceding the granting of such certificate, and must not have an average less than 60, with 3 Professors for said term.

11. An absence, except in case of holidays allowed by the High School Committee, or a death in the family of the pupil absent, shall be counted as a cipher, unless the pupil is on duty

for the school by permission of the Professor in whose room he ought to be, and with the consent of the Principal.

12. In case of sickness, a pupil shall have the privilege of taking his examination average as his term average, provided the application for such privilege be made prior to the commencement of the written examination.

13. All averages and examination marks, except on the last day of examination, shall be read to the pupils, and an opportunity given for appeal before they are entered in the record books. A pupil appealing in regard to his examination marks, shall have the privilege of examining his written answers.

14. A pupil communicating with another when under examination, shall have 10 deducted from his examination mark by the Professor whose questions he is answering, and if detected in the act of cheating by the use of written or printed matter, shall receive a cipher in that branch.

15. These rules shall not be suspended or amended, except by the concurrence of a majority of all the Professors.

COMMENCEMENTS.

The Commencement at the close of the Fifty-seventh Term, was held at the American Academy of Music, on the 14th of February, 1867. The exercises were opened with prayer by the Rev. Phillips Brooks, and an Introductory Address by Wm. N. Ashman, Esq., a graduate of the school. The Honorary Address was delivered by John K. McCarthy; the Salutatory Address, (second honor,) by Ignatius J. Dohan; the Scientific Address, (third honor,) by Edward Chaninel; the Poetical Address, (fourth honor,) by J. A. Haddock; and the Valedictory Address, by J. Bard Worrell.

Other addresses were delivered by Wm. Budd Trites, Geo. W. Graeff, Harry Archambault, Aaron Teller, and P. Frederick Rothermel.

The Commencement at the close of the Fifty-eighth Term, was held at the American Academy of Music, on the 11th of July, 1867. The exercises were opened with prayer by the Rev. James M. Crowell, D. D. The Masters' Address was delivered by Joseph Mason, Esq., of the class of July, 1862. The Honorary Address was delivered by Reid T. Stewart; the Salutatory Address, (second honor,) by John J. Foulkrod; an Address on Eloquence, (fourth honor,) by George W. Hunt; and the Valedictory Address, by Wm. Newton Meeks.

Alfred C. Rex, who had obtained the third honor, was excused from speaking, but other addresses were delivered by Jno. H. W. Chestnut, Jno. D. S. Levis, Edwin M. Hunt, and William Hilt.

The degrees conferred, and the awards of merit and distinction, will be found in the following lists.

DEGREES, DISTINCTIONS AND AWARDS OF MERIT.

FIFTY-SEVENTH TERM, ENDING FEBRUARY 14, 1867.

MASTER OF ARTS,

List of those admitted to the Degree of Master of Arts, being graduates of the Four Years' Course, of not less than five years' standing.

Joseph B. Beale, John O. Deshong, Dimac Dodson, Lewis C. Greene, Albert F. Hochstadter, David W. Hunt, Thomas W. Jones, Joseph Chandler Murphy, William H. M. Oram, George W. Shields, M. D., George N. Watson.—Total, 11.

BACHELOR OF ARTS.

List of those admitted to the Degree of Bachelor of Arts, having completed the Four Years' Course, with their rank and their Graduating Averages.

No. 1, John K. McCarthy, 98.70; 2, Ignatius J. Dohan, 97.10; 3, Edward Chaninel, 96.65; 4, James A. Haddock, 96.53; 5, Isidor Levin, 93.90; 6, Howard Wells, 93.58; 7, Alfred D. Way, 93.35; 8, William J. Campbell, 93.25; 9, Theodore F. Jenkins, 91.78; 10, Alfred B. Mustin, 89.90; 11, John M. Burgess, 86.73; 12, John B. McClung, 84.98; 13, Aaron Teller, 83.40; 14, William B. Trites, 82.55; 15, George W. Loudenslager, 80.25; 16, J. Bard Worrell, 80.23; 17, Harry Archambault, 78.60; 18, George W. Graeff, 78.25; 19, Edward Barry, 78.25; 20, P. Frederick Rothermel, 78.03; 21, Thomas B. Brown, 77.25; 22, Armitage Brearley, 75.85.—Total, 22.

PARTIAL COURSES.

List of those receiving Certificates of having completed PARTIAL COURSES, with their Averages.

FOR TWO AND A HALF YEARS.—Herman H. Mund, 98.2; Leonidas T. Lehman, 72.9; John W. Reeves, 67.5.

FOR TWO YEARS.—Harry S. Hopper, 95.9; Harry L. Warren, 86.4; John K. Campbell, 86.2; John Briggs, 85; James M. Moyer, 84.9; Richard Salinger, 84.7; Joseph S. Riley, 84; Edwin Wolf, 81.4; David Hochstadter, 80.7; Alfred Marshall, 80.7; Erskine H. Wood, 78.4; Hamilton Castle, 74.7.—Total, 15.

DISTINGUISHED.

List of students declared DISTINGUISHED, having attained Term Averages for Scholarship over 95.

DIVISION A.—John K. McCarthy, 99.7; Ignatius J. Dohan, 98.4; Edward Chaninel, 97; Isidor Levin, 95.9; Howard Wells, 95.8; James A. Haddock, 95.6; William J. Campbell, 95.1; Theodore F. Jenkins, 95.

DIVISION B.—Reid T. Stewart, 98.6; John J. Foulkrod, 95.5; Alfred C. Rex, 95.

DIVISION C.—Arthur Williams, 98.7; Edgar Z. Steever, 98.5; Theodore Canfield, 95

DIVISION D.—W. Frederick Monroe, 97.1; Henry Rosenbaum, 96.1; Andrew W. Manship, 96.1; Albert C. Peale, 95.1.

DIVISION E.—Richard G. Lippincott, 97.5; Lewis S. Lee, 95.1; William T. Pierson, 95.

DIVISION F.—William W. Stout, 96; John H. Carroll, 95.1; Joseph W. Janney, 95.1; Edgar S. Cook, 95.

DIVISION G.—Frank P. Prichard, 96.7; Jesse J. Barker, 95,

DIVISION H.—George J. Garde, 96.9.

Total Distinguished, 28.

MERITORIOUS.

List of students declared MERITORIOUS, having attained Term Averages for Scholarship between 85 and 95.

DIVISION A.—J. Bard Worrell, 93.2; Alfred D. Way, 91.9; Alfred B. Mustin, 90.5; William B. Trites, 89.7; Aaron Teller, 89.5; John N. Burgess, 89.3; P. Frederick Rothermel, 86.7; John B. McClung, 86.1; Geo. W. Loudenslager, 85; Thomas B. Brown, 85.

DIVISION B.—John H. Chestnut, 92.4; George W. Hunt, 90.5; John D. S. Levis, 90.1; William N. Meeks, 89; Edward T. Noe, 89; Henry C. Pastorius, 88; Overton Carr, 87.6; William H. Loughlin, 87.2.

DIVISION C.—Albert N. Heritage, 90.1; Charles D'Inwilliers, 88.8; Harry T. Kingston, 88.1; George T. Harris, 85.

DIVISION D.—William H. Francis, 88.5; Edward S. Warren, 88; Walter H. Henszey, 87.6; Samuel C. Lukens, 87.

DIVISION E.—Victor A. Ellis, 93.6; John Bartlett, 90.2; John C. Newland, 90; John Briggs, 86.8; Harry D. W. Moore, 86.7; William F. Jones, 86.6; Alfred Marshall, 86; John K. Campbell, 85.7; Joseph S. Riley, 85.4; James M. Moyer, 85.4; Jacob A. Schiedt, 85.1.

DIVISION F.—Frederick K. Moore, 93.3; William H. Fussell, 93.2; Frank A. Thompson, 93.1; Joseph Esherick, 92.6; Thomas M. Bell, 90.4; David Brooks, 89.9; Thomas Bell, 89.8; Harry C. Wilt, 88.8; Robert W. Bell, 88.6; Oliver H. Hill, 88.1; Langdon C. Stewardson, 87.8; Jackson Graham, 86.8; George W. Oram, 86.5; Isaac C. Underdown, 86; Mardon D. Wilson, 86; William E. Harrop, 85.5; Christian Froelich, 85; Louis Brechemin, 85; Franklin West, 85.

DIVISION G.—Ernest A. Hempstead, 93.8; Dewey Bates, 92.2; George H. Buchanan, 89.5; N. Craig Ligget, 89.3; Henry Willis, 87.9; William Dorey, 87.7; Elihu Thomson, 85.

DIVISION H.—William M. Gardner, 92.8; Horace M. Mattis, 91.8; Perit Dulles, 90.1; James G. Winner, 88.8; Samuel Spanogle, 87.6; Wilbur F. Callaway, 87.6; Henry I. Rosenbaum, 85.7; Orson D. Jones, 85.1; Joseph Hergesheimer, 85.

Total Meritorious, 72.

DEGREES, DISTINCTIONS AND AWARDS OF MERIT.

FIFTY-EIGHTH TERM, ENDING JULY 11 1867.

MASTER OF ARTS.

List of those admitted to the Degree of Master of Arts, being Graduates of the Four Years' Course, of not less than five years' standing.

Holstein DeHaven, William L. Dubois, Rev. Daniel Elwell, Rev. Joseph R. T. Gray, John Henry Hogan, John D. King, Joseph Mason, Esq., Edward F. Moody, Joseph Morgan, Washington F. Peddrick, Gen. Lewis H. Pelouze, U. S. A., Tryon Reakirt, James Taylor, M. D., Wilberforce Wells.—Total, 14.

BACHELOR OF ARTS.

List of those admitted to the Degree of Bachelor of Arts, having completed the Four Years' Course, with their Rank and their Graduating Averages.

No. 1, Reid T. Stewart, 98.6; 2, John J. Foulkrod, 95.2; 3, Alfred C. Rex, 95.2; 4, George W. Hunt, 92.8; 5, John H. W. Chestnut, 92.6; 6, John D. S. Levis, 90.5; 7, William Newton Meeks, 89.6; 8, Edward T. Noe, 88.8; 9, Henry Clay Pastorius, 87.8; 10, Overton Carr, 87.6; 11, Charles Mortimore, 87.1; 12, William H. Loughlin, 86.4; 13, Edwin M. Hunt, 79.4; 14, William Hilt, 77; 15, Cyrus D. Tatman, 75. Total, 15.

PARTIAL COURSES.

List of those receiving Certificates of having completed PARTIAL COURSES, with their Averages.

FOR THREE YEARS.—William J. Armstrong, 74.6.

FOR TWO AND A HALF YEARS.—Nathan H. Suplee, 82.1.

FOR TWO YEARS.—Joseph W. Janney, 96; Harry C. Wilt, 95.1; William T. Peirson, 94.7; Thomas M. Bell, 94.4; William Henry Fusesell, 93; John Harper, 89; Arthur T. Garren, 88.8; John E. McManus, 88.2; Thomas Pinto, 87.8; James M. Girtton, 86.1; Isaac C. Underdown, 84.8; Samuel C. Hoff, 78.5; James Barlow, 71.1.—Total, 15.

DISTINGUISHED.

List of students declared DISTINGUISHED, having attained Term Averages for Scholarship over 95.

DIVISION A.—Reid T. Stewart, 99.5; John J. Foulkrod, 97.8; George W. Hunt, 97.8; John H. W. Chestnut, 97.2; Overton Carr, 95.8; Alfred C. Rex, 95.2; William Newton Meeks, 95.2; William H. Loughlin, 95.

DIVISION B.—Theodore Canfield, 97.2; Charles D'Invilliers, 97; Albert N. Heritage, 95; George T. Harris, 95.

DIVISION C.—W. Frederick Monroe, 97; Andrew W. Manship, 96.8; Henry Rosenbaum, 95.2.

DIVISION D.—Harry D. Moore, 96.4; Richard G. Lippincott, 96.4; Lewis S. Lee, 96.2.

DIVISION E.—William W. Stout, 98; Edgar S. Cook, 96.1; Joseph W. Janney, 96; John H. Carroll, 95.6; Frederick K. Moore, 95.3; Harry C. Wilt, 95.1; Joseph Escherick, 95.

DIVISION F.—Dewey Bates, 98.1; Frank P. Prichard, 95.8; Jesse J. Barker, 95.6; Harry Willis, 95.6; N. Craig Liggett, 95; Ernest A. Hempstead, 95.

DIVISION H.—George R. Buckman, 95.5.

Total Distinguished, 32.

MERITORIOUS.

List of students declared MERITORIOUS, having attained Term Averages for Scholarship between 85 and 95.

DIVISION A.—John D. S. Levis, 94.2; Edward T. Noe, 93.7; Henry Clay Pastorius, 90.9; Charles Mortimore, 89.9; Edwin M. Hunt, 86.9; Cyrus D. Tatman, 85.9; William Hilt, 85.5.

DIVISION B.—William Kent, 92.4; Harry T. Kingston, 92.2; William H. Rogers, 88.6; Henry Schmele, 87.1; David Dailey, 86.9; Charles E. Perkins, 86.1; John F. Caldwell, 85.5.

DIVISION C.—Albert C. Peale, 90.2; Edward S. Warren, 89.7; John B. Devine, 85.9; Walter H. Henszey, 85.7.

DIVISION D.—Victor A. Ellis, 92.4; Benjamin F. Moore, 89.6; Wm. F. Jones, 89.1; Eugene T. Linnard, 89; John Bartlett, 88.8.

DIVISION E.—Thomas M. Bell, 94.4; Robert Bell, 93.5; Louis Brechemin, 93.1; William H. Fussell, 93; Thomas Bell, 92.2; David Brooks, 91.6; William E. Harrop, 91.5; Thomas H. Eckfeldt, 90.8; John Harper, 89; Arthur T. Garren, 88.8; John E. McManus, 88.2; Oliver H. Hill, 87.9; Thomas Pinto, 87.8; James M. Girtton, 86.1; Isaac C. Underdown, 85.

DIVISION F.—George H. Buchanan, 94; Elihu Thomson, 92.8; David E. Appel, 89.2; Samuel B. Moyer, 89; S. Rowland Caldwell, 88.6; William L. Austin, 88.4; Wilmon W. Sites, 87.6; Francis Moore, 86.7; Martin S. Clarke, 86.6; W. T. Carlos Sanders, 85; William J. Suplee, 85.

DIVISION G.—Horace M. Mattis, 94; George G. Thomson, 92.5; Wilbur F. Callaway, 92.2; William M. Gardner, 92.1; William W. Carr, 91.1; John M. Roecker, 91; Perit Dulles, 90.7; Henry I. Rosenbaum, 90.2; Henry Taylor, 89.5; Abraham M. Beitler, 88.2; John E. Cook, 88.2; Ch. H. Fahnestock, 87.8; Oren B. Colton, 87.6; Chas. A. Mennig, 86.7; Howard E. Trimble, 86.7; James Alcorn, 86.6; George H. Bradley, 86.2; Franklin P. Barr, 85.8; Edwin S. Meredith, 85.3; Charles F. Fisher, 85; George W. Widmer, 85.

DIVISION H.—George W. Cloak, 92.3; Frank Fisher, 90.1; Alexander H. Spencer, 90.1; Theodore H. Lyons, 89.9; Walter Boswell, 87.1; Gates D. Fahnestock, 85.4; Harry D. Meyer, 85.2; Joseph S. Potter, 85; Peter McCahey, 85.

Total Meritorious, 79.

REPORT

OF THE

Principal of the Girls' Normal School.

Philadelphia, January 14th, 1868.

TO MESSRS. ABRAHAM S. JENKS, GEORGE W. NEBINGER, JOHN PRICE
WETHERILL, JOHN G. BRENNER, and EDWARD ARMSTRONG.

GENTLEMEN:—

In compliance with the regulations adopted by the Board of Controllers of Public Schools, in the First School District of Pennsylvania, for the government of this school, I respectfully submit the following report, for the year ending December 31, 1867, embracing the fourteenth and fifteenth terms of the High School, and the thirty-eighth and thirty-ninth of the Normal School.

Since the organization of this school, under the name of the Normal School, about twenty-six hundred pupils have been admitted, of this number, about one thousand have graduated, and nearly fifteen hundred have been appointed to situations as teachers.

The following statement exhibits the number of pupils attending the school, at the beginning and end of each term, and also the admissions and withdrawals, since the last report:

Attending school, January 2d, 1867,	344
Graduated or discontinued from January 2d, to February 15th, 1867.	67
Remaining,	277
Admitted at the close of the term,	89

Never attended,	6
Attending school, February 18th, 1867,	380
Graduated or discontinued at the close of, or during the term ending July 12th, 1867,	72
Remaining,	288
Admitted at the close of the term,	83
Never attended,	7
Attending school, September 2d, 1867,	364
Discontinued from September 2d, to December 31st, 1867,	6
Attending school, December 31st, 1867,	358

COURSE OF INSTRUCTIONS.

The following embraces the course of instruction :

Etymology and Analysis of the English Words, Rhetoric, Composition, Elocution, History of England, General History of the World, English and American Literature, Drawing, Vocal Music, Geometry, Algebra, Chemistry, Natural Philosophy, Constitution of the United States and of Pennsylvania, Moral Philosophy, Theoretical Mathematics, Geology, General Principles of Education, Instruction in Penmanship, Orthography, Reading, Grammar, Analysis of Language, Constitution of the United States, History of the United States, Geography, Arithmetic and Mensuration in reference to teaching said branches, and Practice in Teaching.

GRADUATING CLASSES, &c.

The following ladies graduated and received their diplomas, February 1st, at the close of the fourteenth term :

Jennie W. Wylie, Beulah H. Hinchman, Emma D. Miller, Ella E. Clay, Emma M. Gaskill, Clara S. Beale, Lydia M. Watson, Annie J. Kohler, E. Allie Blakeley, Lizzie S. Kelly, Bessie Smith, Mary R. Culin, Ellie A. Miller, Lizzie T. Janney, Anna E. Fussell, Maggie S. Cavanaugh, Lizzie R. Morrison, Emma B. Trinkle, Tamzen C. Smith, Clara Stauffer, Mary S. Scott, Anna Thayer, Augusta Pierson, Emily S. Abbott, Fannie J. Barbe, Clara R. Elliott, Mary A. Ellis, Agnes E. O'Harra, Ida R. Betton, Alice R. Franklin, Chrissy Hollenbach, Alice Gibson, Tillie Scott, Bessie W. Connell.—Total, 34.

DISTINGUISHED.

SECTION A.—Jennie W. Wylie, Term Average, 98.1; Beulah H. Hinchman, 97.3; Emma D. Miller, 96.2; Ella E. Clay, 95.6; Emma M. Gaskill, 95.1; Clara S. Beale, 94.9; Lydia M. Watson, 94.2; Annie J. Kohler, 93.8; E. Allie Blakeley, 92.5; Lizzie S. Kelly, 92.0; Bessie Smith, 92.0; Mary R. Culin, 91.6; Ellie A. Miller, 91.5; Lizzie T. Janney, 91.4; Anna E. Fussell, 90.2.

SECTION B.—Lizzie W. Dickson, 98.6; Maggie S. Prichard, 96.0; Fannie Bean, 94.2; Anna H. Krewson, 91.5; Mary W. Stevens, 91.2; Sallie D. Burke, 90.3; Sophie Stagg, 90.0.

SECTION C.—Emma E. Geiselman, 98.2; Mary E. Hall, 94.3; Mary A. Manly, 93.6; Mary D. Eldredge, 93.5; Anna D. Mailert, 92.6; Mary E. Hutchinson, 91.3; Lizzie Arnold, 90.4.

SECTION D.—Ella T. Demuth, 97.4; Susie R. Mitchell, 96.9; Mary Kramer, 95.9; Lizzie McDuffy, 95.6; Jennie C. Piper, 94.5; Anna Murray, 94.5; Annie Bean, 94.5; Minnie R. Wylie, 94.1; Mary S. Little, 93.4; Linda M. Taylor, 92.9; Mary Polsz, 92.8; Emma L. Somers, 92.6; Kate Craig, 92.6; Anna B. Lloyd, 92.4; Marie E. Van Hook, 91.9; Annie Randall, 91.8; Sophie Muhr, 90.8; Lavinia McDermond, 90.7; Lidie E. Hewitt, 90.6; Annie Lukens, 90.5.

SECTION E.—Lidie C. Bower, 97.7; Laura Dales, 93.5; Anna D. Wint, 93.3; Mary M. Harper, 92.8; Fanny Abeles, 92.5; Sidie R. Potter, 91.5; Emma Hulton, 90.2.

SECTION F.—Louise Young, 97.9; Fannie H. Wyeth, 97.5; M. Elizabeth Durborow, 97.2; Annie R. Kemble, 96.5; Anna D. Parker, 95.7; Annie W. Siddall, 93.4; Julia A. Dunn, 93.3; Mary A. Miller, 92.9; Mattie E. Cauders, 92.8; Susie S. Hanley, 92.4; Miriam C. Hawkins, 91.9; Lottie C. Murphy, 91.7; Mary A. De Sanno, 91.7; Nellie T. Keene, 91.5; Anna M. Everman, 91.2; Lilian R. Comly, 91.2; Jeannie Cherry, 91.1; Laura R. Gault, 90.6.

The following ladies graduated and received their diplomas, June 28th, at the close of the fifteenth term:

Lizzie W. Dickson, Maggie S. Prichard, Fannie Bean, Mary W. Stevens, Emma J. Foot, Ella E. Wert, Sallie D. Burke, A. L. Churchman, Kate J. Graeff, Theresa H. Mund, Jennie McNeilau, Sallie J. Ferguson, Lottie Somers, Sophie Stagg, M. Bell Ware, Rebeca H. Bigelow, Sallie J. Charles, Annie F. Putt, Mary C. McKee, Ida S. Cox, Lizzie M. Bunting, Ella F. Pearson, Mary T. Hartshorn, Julia Sullivan, Annie R. Colburn, Marian Bennett, Rose Euler, Annie H. Krewson, Lizzie W. Hood.—Total, 29.

DISTINGUISHED.

SECTION A.—Lizzie W. Dickson, Term Average, 97.7; Maggie S. Prichard, 96.7; Fannie Bean, 94.5; Mary W. Stevens, 94.4; Emma J. Foot, 92.6; Ella E. Wert, 92.6; Sallie D. Burke, 91.8; Augustine L. Churchman, 90.9; Kate J. Graeff, 90.6.

SECTION B.—Emma E. Geiselman, 96.3; Mary E. Hall, 93.7; Mary D. Eldridge, 93.5; Anna D. Mailert, 93.0; Mary E. Hutchinson, 90.6; Mary J. Keisel, 90.4; Maggie G. Johnson, 90.0.

SECTION C.—Ella T. Demuth, 97.0; Mary Kramer, 96.9; Susie R. Mitchell, 96.7; Annie Murray, 93.9; Ray R. Bennett, 93.6; Mary S. Little, 93.4; Lizzie McDuffee, 93.2; Annie Randall, 92.4; Virginia C. Piper, 92.2; Minnie R. Wylie, 92.1; Annie Bean, 92.0; Kate Craig, 91.8; Linda Taylor, 91.5; Annie Lukens, 90.2; Anna B. Lloyd, 90.0.

SECTION D.—Lidie C. Bower, 96.9; Laura Dales, 93.6; Mary M. Harper, 93.4; Anna T. Wint, 92.8; Carrie E. Janney, 92.1; Emily Spering, 91.4; Sarah C. Littlefield, 90.7; Mary Wright, 90.2.

SECTION E.—Louise Young, 96.4; Fannie Wyeth, 96; Mary Miller, 93.9; Susie Hanley, 92.6; Annie R. Kemble, 92.5; Nellie T. Keene, 91.5; Jeannie Cherry, 90.6; Lottie C. Murphy, 90.4.

SECTION F.—Kate E. Plumber, 94.7; Annie H. Thompson, 93.9; Harriet E. Richardson, 93.5; Kate A. Nevens, 93.3; Sallie Kaye, 92.4; Priscilla Fry, 92.3; Mary E. Jones, 92.1; Mary F. Souden, 91.4; Jennie R. Troutman, 91.3; Ellen Bradshaw, 91.2; Susie Gaskill, 91.2; Maggie R. Cathcart, 91.1; Elmira Meredith, 91.1; Mary S. Ellis, 90.3; Mary R. Brevoor, 90.1; Annie L. Callet, 90.0.

TEACHERS.

The following ladies were appointed to situations as teachers during the year:

Beulah H. Hinchman, Ella E. Clay, Alice R. Franklin, Agnes Gibson, Clara Stauffer, Ida R. Betton, Emily S. Abbett, Mary Ellis, Maggie S. Cavanaugh, Tamzen Smith, Agnes E. O'Harra, Chrissy Hollenbach, Augusta Pierson, E. Allie Blakely, Mary R. Culin, Bessie Smith, Lizzie S. Kelly, Annie E. Fussell, Tillie Scott, Lydia M. Watson, Lizzie T. Janney, Emma D. Miller, Emma Gaskill, Maggie Metcalf, Mary S. Scott, Kate R. Steever, Mary E. Elliott, Annie Finnegan, Mary S. McCool, Lavina McDermond, Mary Dounton, Sallie B. Paullin, Mary E. Pugh, Helen H. Pester, Emma V. Lane, Emma S. Nickerson, Ella V. Eldredge, Kate Brady, Sophie M. Knox, Jennie Cherry, Fannie Wyeth, Louisa Holmes, Sallie Wolfe, Ella R. Simmons, Annie V. Johnson, Harriet S. Hooper, Mary Manley, Lizzie Parker, Mattie L. Harned, Maggie S. Hoffner, Kate Griffin, Anna Hiles, Kate Day, Theresa McCullough, Susie McNabb, Jennie S. Vandever, Emma E. Phillips, Nellie L. Dewey, Anna Heite, Sallie S. Clayton, Melvina Vandyke, Julia Costigan, Fannie F. Reinhold, E. Lizzie Bird, Alice B. Ireland, Anna Farrell, Martha Jones, Lizzie Scott, Mary B. Heald, Sallie Nell, Anna E. Ridgway, Mary Marple, Emma Burvell, Maria Cathcart, Fannie E. Bartlett, Mary Woman; Johanna Ranck, Theresa O'Neill, Mattie C. Shourds, Sallie Wiler, Anna Thompson, Helen Harper, Sallie G. Blanchard, Lottie Somers, Annie R. Colburn, M. Bell Ware, Mary T. Hartshorne, Rose Euler, Julia Sullivan, Mary C. McKee, Ella F. Pierson, Ella E. Wert, Anna F. Putt, Emma J. Fort, Theresa Mund, Sallie J. Charles, Sophie Staggs, Sallie D. Burke, Mary L. Pearson, Anita Nickerson, Mary W. Stevens, Annie H. Krewson, Fannie Bean, Fannie Stark, Lizzie W. Dickson, Mary A. Bower. Total, 106.

DEPARTMENTS OF INSTRUCTION.

Theory and Practice of Teaching, and Mensuration.

By the Principal.

Lectures on the Principles of Education, Instruction in School Government, and in teaching the Elementary Branches, and Practical Geometry.

DEPARTMENT OF GRAMMAR.

By Miss Anna B. Duff.

Review and general instruction in Grammar, Analysis of Language, Parsing and Composition.

DEPARTMENT OF LITERATURE.

By Miss Matilda Barns.

Biography of American and English authors, and Analysis of their writings, American and English Literature, and American and English History.

DEPARTMENT OF RHETORIC.

By Miss Lavinia Whittaker.

Elements of English Composition, Criticism, Essays, Moral Science, and Rhetoric.

DEPARTMENT OF DRAWING AND PENMANSHIP.

By Miss Lydia F. Hamor.

Linear Drawing, exercises in Drawing from Models, Principles of Perspective, Exercises in Crayon, and Plain and Ornamental Penmanship.

DEPARTMENT OF HISTORY AND ETYMOLOGY.

By Miss Sallie Walker.

Analysis and Synthesis of Words, Etymology of Words, Political Geography, and General History of the World.

DEPARTMENT OF PHYSIOLOGY, PHYSICAL GEOGRAPHY, AND CONSTITUTION.

By Miss Sarah W. Smith.

Physiology, with use of Manikin, Hygiene, General Principles of Anatomy, with use of Skeleton, Physical Geography, Geology, Constitution of the United States, and Constitution of Pennsylvania.

DEPARTMENT OF ALGEBRA AND THEORETICAL MATHEMATICS.

By Miss Mary C. Dickes.

Theoretical Arithmetic, review of Elementary Arithmetic, and Algebra.

DEPARTMENT OF ELOCUTION AND GEOGRAPHY.

By Miss Emma E. Geiselman.

Reading, Declamation, Principles of Elocution, Vocal Culture, Local Geography, and Map Drawing.

**DEPARTMENT OF PRACTICAL MATHEMATICS AND
GEOMETRY.**

By Miss Lizzie W. Dickson.

Review of Practical Arithmetic, Mental Arithmetic, Instruction in Higher Mathematics, and Geometry.

DEPARTMENT OF MUSIC.

By Professor Cornelius Everest.

Elementary instructions in Principles of Music, and Practice in Vocal Music.

MISCELLANEOUS.

Instruction in Natural Philosophy and Chemistry, imparted entirely by Lectures, with the use of Philosophical and Chemical Apparatus by the Principal.

The average daily attendance for the year was more than ninety-eight per cent., notwithstanding the frequent inclemency of the weather, the liability to sickness, and the great distance which many have to travel to attend the school. Deducting the absence on account of sickness, that arising from all other causes combined, amounts to almost nothing, as very frequently days, and sometimes weeks pass, without a single pupil being absent, except from sickness.

The school continues to progress, under the present organization, to the entire satisfaction of all interested in its success. The plan adopted two years since, appears to be maturing into great usefulness, and the labors of the teachers are rewarded with satisfactory results. It is earnestly hoped a School of Practice will be established on a proper basis, at an early day. The want of this feature, at present, is the only defect in the school, and which, if wisely organized, will greatly increase its usefulness to the public, by furnishing such practice in teaching as will enable the youthful teacher to see the difficulties which necessarily surround her when she enters a Primary or Secondary School as a beginner.

There is still need of a much more extensive library than the one at present in use, as many books of reference not found therein, are almost daily needed to aid the pupil teacher and pupil in search of important information, necessary in the course of instruction; and it is hoped some wise means will be adopted to furnish this *desideratum*.

The department of Chemistry and Philosophy still needs considerable addition to the apparatus, necessary in a regular and thorough course of lectures.

During the year the school suffered a great loss in the death of Miss Mary F. Ely, teacher of Higher Mathematics and Geometry. Miss Ely was connected with the school for several years, and exercised great influence in favor of industry and proper discipline. In her death the public lost a teacher, whose gentle and amiable character, whose earnest faithfulness, integrity, uprightness and constancy have always been a bright example.

Miss Lizzie W. Dickson was chosen as the successor of Miss Ely. Miss Dickson ranks among the most distinguished graduates of the school, and possesses rare ability for the department to which she has been called, and it is confidently believed, experience will prove her eminently qualified for the post.

Towards the close of the year, Miss Ella Buzby, teacher of Drawing and Penmanship, resigned, and Miss Lydia F. Hamor was elected to fill the vacancy. Miss Hamor brings to her position large experience, the most flattering testimonials, and great merit. Her peculiar talent for Drawing and Penmanship has been long and eminently known.

It is hoped a larger building and more suitable accommodations will be provided, that the school may occupy a larger field of usefulness. The subject needs to be brought prominently before our City Councils, and it is confidently believed that they will make ample and liberal provision for the proper demands of an institution, which must in the future minister greatly to the wants and success of our whole educational system, as more than three-fourths of the teachers employed in this city come from this school.

At the Teachers' examinations, conducted by entirely disinterested and competent persons, the results show the eminent fitness of the graduates to teach the subjects studied in the lower schools, and at the last commencement every lady in the graduating class received not only her Diploma, but also a Certificate of qualification to teach, issued by the Controllers of Public Schools, and merited by close application to study.

Having thus presented a brief statement of the wants and condition of the school, I have the honor to remain,

Very respectfully,

GEO. W. FETTER,
Principal.
